After School

Individualized Plan for Care

The State of CT, Office of Early Childhood requires that all children with a special health need have an individualized plan for care on file. This plan needs to be filled out and signed by the child's physician. The plan needs to be a step-by-step strategy that the After School teachers can put in place in case of emergency or need for intervention. All children that have an allergy, special dietary need, dental issue, hearing or visual impairment, chronic illness, developmental delay, or a history of contagious disease qualify for an individualized care plan. This form will be in your child's file, and a copy will be placed in the classroom.
