DPH County Guideposts

Leading Indicator	LOW Favors more In-Person Learning	MODERATE Favors moving to Hybrid Learning	HIGH Favors moving to Remote Learning
Number of new cases of COVID-19 (7 day rolling average of new cases per 100,000 population per day)	< 10 new cases per 100,000 population	10 to < 25 new cases per 100,000 population	25+ new cases per 100,000 population

The “low” and “moderate” categories indicate conditions in the area are appropriate for schools to provide at least a partial in-school option to students. **The district and building-level decisions will ultimately be made at the local level.** However, should a district determine not to provide an in-school option while in the low or moderate category, an exception review is required from a panel with representatives from the State Department of Education, the State Board of Education and the Department of Public Health. Superintendents should consider developing a local structure to include the school medical advisor, local health director, and school nurse leader to consult when making decisions.
