In-Person Learning: Safely in School Students are Learning

Every student (grade 6th- 12th) is on ROCORI campus full time every day. Students will learn in a traditional, at-school learning experience with additional safety measures implemented based on guidance from Minnesota and Stearns County health officials. Social distancing is recommended, but not required. Hand washing, general cleaning, health screening, and other safety protocols will continue to keep students safe.
*Families can choose to opt-in to full time distance learning through ROCORI on-line option

Hybrid Learning: Safely at Home and in School Students are Learning.

Students will rotate attendance, A and B schedule, so classrooms do not exceed 50% capacity on any given school day. Social distancing is required under the hybrid model.
*Families can choose to opt-in to full time distance learning through ROCORI on-line option

Distance Learning: Safely at Home

If local numbers become too severe to hold in person classes, ROCORI schools will transition to distance learning. In the event of distance learning, all teachers will provide lessons through online platforms including Schoology and Microsoft Teams. Students will receive exposure and training in Schoology and Teams in the fall to prepare for a potential switch to distance learning. Students will engage in classes and conduct learning remotely. Learning includes direct teacher instruction and independent student work, with a combination of virtual meetings, interactive class sessions and pre-recorded videos.

Feedback from ROCORI families in the spring highlighted the need for student-to-teacher and student-to-student interaction in distance learning. In the event of needing to implement distance learning, ROCORI teachers will design lessons that emphasize these interactions through Schoology and Teams. Families will receive a brief introduction to Schoology and review of Teams at entrance conferences held on September 8th and 9th.
