Subject: Attendance Enrollment Survey and a brief update
To:

Dear Wardlaw+Hartridge Parents,

In our recent Town Hall, we informed you that we would soon send a Google Form and ask you to complete it to indicate whether your child or children will begin the year attending in-person or will opt to begin remotely. We need to accomplish the impossible, which is to obtain responses from every single family so we can complete our scheduling with accurate data.

Here is the [link](#) for the survey.

We are working on responses to the nearly 200 questions submitted at the Town Hall and will send that along as soon as we can, probably by early next week. We are also creating documents to illustrate clearly the protocols we will use if we encounter symptomatic students or employees and if anyone in the community tests positive for COVID-19. We have resolved two other items discussed at the Town Hall: We have ordered thermal screening systems for three entrances to the school, which will provide our primary temperature screening. In addition, we have ordered a schoolwide air purification system that uses UV light and bipolar ionization to continuously purify the air. These units will be installed in the ductwork and treat all of the air that circulates through the system.

Please complete the survey now if possible, or very soon. Division Heads will send you information soon regarding divisional parent meetings you may wish to join.

Be well,
Andy
