

THE HARRY I. FRANCO LEADERSHIP ACADEMY

The Harry I. Franco Leadership Academy:

The Harry I. Franco A”H Leadership Academy is a four year program that will impart the fundamentals of leadership to those interested in becoming the leaders of tomorrow. A theoretical understanding of the importance of leadership will be taught to students, along with a practical understanding of how to apply such lessons within the Jewish community and the world at large.

We hope that through The Harry I. Franco Leadership Academy, students will realize their full potential as leaders, career oriented individuals and as active members of their communities.

CareerTracks - A Division of The Harry I. Franco Leadership Academy

CareerTracks:

CareerTracks is Hillel Yeshiva High School’s new career exploration program that aims to inspire students to explore new interests and provide opportunities for them to learn about potential career options. It strives to broaden their understanding of diverse career paths and possibilities by bringing guest speakers into school as well as through off-site visits to companies and organizations where students can hear from executives and get a firsthand look at how different businesses run. Upcoming highlights for the year include notable guest alumni speakers and community professionals, office visits to a top law firm, and a company featured on ABC’s Shark Tank. There will also be trips to NY Jets Sports Business Day and participation in Liberty Science Center’s Live from Surgery programs.

Under the auspices of the Leadership Academy, Career Tracks introduces our students to a broad group of careers representing different segments of the professional community. This year the focus is on Health and Medicine; Business and Technology; Real Estate; and Fashion and Design. Each week during their club period, students who have signed up for one of these tracks learns about the presenter’s unique journey and day to day activities in their field of expertise. The values of leadership are interwoven in each of these tracks.
