Re: Norton Public Schools

The following is intended to update you on the status of the HVAC Units at Norton Public Schools. Mechanical Air Controls has routinely serviced and maintained the HVAC Units on both a Protective Maintenance basis and a Corrective Maintenance basis for the past nineteen years. This includes the Exhaust Fans, Roof Top Units, Air Handler Units, Gas Heaters and Cabinet Unit Heaters. To the best of our knowledge all the HVAC equipment has been up and operable. Mechanical Air Controls plans on routinely servicing these units once again in the upcoming fall months. Norton Public Schools and Mechanical Air Controls have a great relationship and if any issues may arise, we will send our technicians out right away to assess the situation.

Sincerely,

A handwritten signature in black ink, appearing to read "Richard White", written in a cursive style.
