

## DESIX DAVIS ESSENTIAL SKILLS AND KNOWLEDGE

## CAD Mech Design 2

## **Course Description**

The second in a sequence of courses that prepares individuals with an emphasis in developing technical knowledge and skills to develop 3D models in support of mechanical and industrial engineers and related professionals . This includes instruction in the use of 3D Computer-Aided Design (CAD) software model creation, and technical communication.

## Strands

- 1. Students will understand and applied mathematics, measuring conventions, and scale.
- 2. Students will be able to create a 3D part model with the correct dimensional and geometric sizes and constraints.
- 3. Students will be able to understand and demonstrate the use of correct line types.
- 4. Students will be able to develop and correct replace sectional views.
- 5. Students will be able to understand and demonstrate essential tolerancing techniques.
- 6. Students will be able to understand and use 3D computer software to create technical drawings.
