

**KS2 & KS3 SCIENCE JAWS 2014**  
at Jerudong International School, Brunei

**Friday 7th and Saturday 8th November 2014**

This Job Alike Workshop is an opportunity for FOBISIA teachers across the region to share good practice and develop new ideas about science across KS2 and KS3. All participants will be actively involved in creating the agenda to ensure that the 2-day event meets the needs and wishes of those attending. All sessions will be delivered by those participating in the workshop.

We have listed some session topics below, but we are looking forward to further suggestions. We are aware that some sessions will be suitable for both Key Stages, whilst others will be KS2 or KS3 specific. Please let us know of the specific challenges you are facing, and also the good practice you are willing to share.

**Proposed session ideas include:**

Maintaining excellence in science  
Assessment of practical skills and scientific knowledge  
Creative ways to engage our students  
P4C strategies in science  
Digital learning in science  
Effective preparation for IGCSE  
Active and engaging starter and plenary activities  
Science outside the classroom  
Vocabulary - definitions to concepts  
Effective use of TA's and LSA's

We will share a google drive folder with all the delegates to build the agenda collaboratively and to share resources in the run up to and during this event.

To register for the event please use this [link](#)
