# FOBISIA DIGITAL LEARNING JAWS

## DIGITAL LEARNING ACROSS THE CURRICULUM

The JAWS will collect together a community of digital leaders, practitioners and interested educators, in order to have meaningful discussions and demonstrations around digital teaching and learning. There is a wide diversity of methods and strategies for the integration of digital learning and pedagogy in our classrooms. An event like this aims to show these methods and ideas, to a receptive and engaged audience. The combination of new approaches, and developing networks, vastly increases the confidence of those new to the digital learning arena, and allows those who excel in it to make sustainable change for the better around the region.

These workshops will be focused around digital learning in the following areas;

The Arts

The Sciences

The Junior Classroom

Language Learning

Mathematics

Design

Digital Leaders and Integrators
