TAIPEI EUROPEAN SCHOOL

**+POSITIVE change +POSITIVE education**

## **A case for ACTION RESEARCH**

**9am-5pm, Saturday 14th May @ Taipei European School, Taiwan**

**For the first time in Asia** this exciting and unique one day conference aims to provide delegates with an understanding of the global motivation for **Positive Education** and the opportunity to explore how **Action Research** methodologies can support the evaluation and integration of PERMA within their own schools to enhance academic achievement, character and well-being. The event features keynote speaker, facilitator and evidence-based coach **Clive Leach**. Clive will share examples of successful change in schools worldwide informed both by his own practice in the design and delivery of Positive Education programs in the International School sector in Asia and the latest research from some of the world's leading schools. This engaging and experiential day will challenge our thinking about creating a positive climate for Action Research and provide the space to reflect on our current and future practice to build flourishing school communities.

### **Delegates will:**

- Learn about **PERMA** (Positive emotion, Engagement, positive Relationships, Meaning and Purpose, Accomplishment) and how to embed this foundation for optimal functioning within their school community
- Understand and know how to apply an Action Research model
- Use coaching conversations to support each other to identify opportunities for research in their own schools
- Take away an initial action plan for an Action Research project

**Clive Leach** is an organisational coach who works widely across the education, government and corporate sectors supporting the well-being, engagement and performance of both adults and young people. He is a Global Representative for the **International Positive Education Network** <http://www.ipositive-education.net> which seeks to enhance flourishing in whole school communities through promoting and enhancing best practice in the building of character & well-being alongside academic achievement.

Clive has actively supported schools in Asia, presented at numerous international conferences and is lead author of the chapter '**The Integration of Positive Psychology & Coaching in Schools**' in the Sage publication 'Coaching in Professional Contexts'. Clive is also a visiting lecturer at the University of East London, currently teaching on the world's first Master of Applied Positive Psychology & Coaching Psychology Program.
