

# Daily Home Screening for Students

Updated August 20, 2020

**Parents/Caregivers:** Please take your student's temperature each morning and then complete this daily screening for students. If you answer YES to the symptoms below, your student cannot attend school. Please report the absence and symptom(s) to your campus.

This is to be used as a daily home screening for attending school. The CDC's complete list of *Symptoms of Coronavirus* is available at:

<https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>

## Symptoms

If your student has any of the following symptoms, that indicates a possible illness that may decrease the student's ability to learn and also put them at risk for spreading illness to others. Please check your student for these symptoms:

	Temperature 100.0 degrees Fahrenheit or higher
	Sore throat
	New uncontrolled cough that causes difficulty breathing (for students with chronic allergic/asthmatic cough, a change in their cough from baseline)
	Diarrhea, vomiting, or abdominal pain
	New onset of severe headache, especially with a fever
	Has your child been in close contact with anyone who tested positive for COVID-19 or was diagnosed with COVID-19 in last 14 days?
	Has your child been diagnosed with COVID-19 by a health care provider in the last 10 days?

If a student is ill and has not been in close contact with someone who has been diagnosed with COVID-19, the student should stay home and away from others until symptom-free for at least 24 hours without fever reducing medication. If the symptoms worsen, a healthcare provider should be contacted to determine if testing for COVID-19 is necessary.
