# Programme

## **Some suggested ideas for workshops:**

Project-based/enquiry learning in STEAM

Integrating computing and engineering into STEAM at primary level

Developing problem-solving skills

Effective assessment in STEAM

## **Some suggested ideas for sharing and discussion:**

What STEAM is, and what it isn't.

What does STEAM look like at your school?

What is the purpose of STEAM and how does this affect pedagogy and implementation?

Knowledge or process: Which is more important in STEAM?

To what extent does the quality of a child's final STEAM product or project matter?
