

HEALTH PROTOCOLS FOR STUDENTS

This diagram explains our health protocols for individual cases of COVID-19 exposure, symptoms, and diagnosis. We will work in concert with the Florida Department of Health to contact trace and quarantine cases of COVID-19 exposure and diagnosis.

Please remember, the primary line of defense in limiting exposure to COVID-19 is the daily at-home health screening and temperature check. Do not bring your child to campus if they have a temperature of 100 degrees Fahrenheit or higher, are medicated to reduce a fever, or exhibit any of the following symptoms: fever, chills, shortness of breath or difficulty breathing, new cough, new loss of taste or smell.

EXPOSURE, NO SYMPTOMS	DIAGNOSIS, NO SYMPTOMS	SYMPTOMS
<p>Student shares he/she was exposed to someone with COVID-19 within the last 2 weeks, but is NOT symptomatic</p>	<p>Student shares he/she was diagnosed with COVID-19 less than 10 days ago, but is NOT symptomatic</p>	<p>Student is presenting at least one of the following COVID-19 symptoms: fever, chills, shortness of breath or difficulty breathing, new cough, new loss of taste or smell</p>
<ul style="list-style-type: none"> • Separate student with a supervised adult wearing a face covering and standing at least 6 feet away • Send student to clinic where student will be supervised by a medical professional • Student should wear a cloth face mask • Enact plan to safely send student home as quickly as possible • Return to school after 14 days since last close contact and if symptoms do not develop • If symptoms develop, follow guidelines under Symptoms section • Participate in Digital Campus remote learning while at home, if possible • Notify local health department and follow their recommendations. The local health department will give guidance at that time if it is necessary to quarantine teacher and entire class. 	<ul style="list-style-type: none"> • Isolate student with a supervised adult wearing a face covering and standing at least 6 feet away • Send student to clinic where student will be supervised by a medical professional • Student should wear a cloth face mask • Clean and disinfect the exposed areas • Enact plan to safely send student home as quickly as possible • Return to school once it has been 10 days since first positive COVID-19 test, AND if no symptoms develop since positive test • Participate in Digital Campus remote learning while at home, if possible • Notify local health department and follow their recommendations. The local health department will give guidance at that time if it is necessary to quarantine teacher and entire class. 	<ul style="list-style-type: none"> • Isolate student with a supervised adult wearing face covering and standing at least 6 feet away • Send student to clinic where student will be supervised by a medical professional • Student should wear a cloth face mask • Clean and disinfect the exposed areas • Provide supportive medical care if needed • Enact plan to safely send student home as quickly as possible • If student is diagnosed with COVID-19 based on a test, their symptoms, or does not get a COVID-19 test but has had symptoms, they can return to school when: <ol style="list-style-type: none"> 1. At least 10 days have passed since first symptoms appeared AND 2. At least 24 hours have passed since recovery as defined by the resolution of fever without fever-reducing medication AND 3. Symptoms have improved • If student has a negative COVID-19 test, they can return to school once there is no fever without the use of fever-reducing medication, and they have felt well for 24 hours • Participate in Digital Campus remote learning while at home, if possible • Notify local health department and follow their recommendations. The local health department will give guidance at that time if it is necessary to quarantine teacher and entire class.

If you have any questions about this health protocol, please contact our school nurse, Marissa Johansen, at mjohansen@lhps.org or 407-206-1900 ext. 1234.
