

STOP
COVID-19
CORONAVIRUS

COVID-19 is thought to spread mainly from person-to-person between people who are in close contact with one another.

- ➔ It can spread through respiratory droplets produced when an infected person coughs, sneezes, or talks.
- ➔ These droplets can land in the mouths or noses of people who are nearby or possibly be inhaled into the lungs.
- ➔ Recent studies have suggested that COVID-19 may be spread by people who are not showing symptoms.

**STAY AT LEAST 6 FEET FROM
OTHERS AT ALL TIMES**

**WEAR A FACE COVERING AND
WASH HANDS OFTEN**
