

Consider athletic spaces from your own childhood. What made them memorable?

- Community gathering space
- Inclusive, where the community could come together.
- Our spaces weren't special, standard public HS grounds in NY (track, gym, outward bound course, fields) but they did not privilege the "athlete", they were open for all of us.
- School spirit
- Spaces that brought the wider community together.
- Lots of space, hive of activity, sense of community and on race days expansion of family, strong sense of school "house" team
- Athlete / Team recognition
- Team work, new friends, winning, tough losses
- Community coming together for sporting events and performances...
- Bright lighting and lots of space
- Flexibility to have multiple activities 'in play' at any time. outside of structured class time
- Full community event - the place to be!
- Cheering & support from the community
- Easy access
- I think that any space where people can gather and interact are already special in some regard as people can interact and be social. That is part of what makes sports so great.
- Locker room before and after swim practice. Community
- Nothing in comparison to SAS....The extent of our athletics approach to physiology and safety was the "magic wet sponge"
- Inner city public school. Black top. Very little space
- Wide open practice and game fields, connected to and integrated with the campus. Friday Night Lights.
- A warm, bright space in the cold, dark winter...
- Green, well shaded, running around
- Small town. We had a track and a hill. :)
- Laughing and cheering on friends from other teams when we weren't playing our sport at the time

After looking at some of the initial design ideas...

What Possibilities do you see? What Questions do you have?

- There are currently 3 baseball/softball fields. In the new design, will there be fields to support eagle baseball/softball?
- Are there indoor racquet courts built into the new design?
- How can we use indoor / covered space soft racquet sports like squash / racquetball?
- I wanted to understand if the pool spaces were connected or whether the Perch was two stories?
- What could be alternative uses for the Perch beyond athletics?

- Can we consider using indoor space for the golf team - simulators to analyse golf swing. Consider outdoor putting facility
- Awesome focus on flow, students headed to practice, parents headed to games etc. Great chance for community engagement.
- I want to understand space around the new pool - over competitions/events the ability to host additional families and children is important
- What is going to happen to the tennis courts, because currently they are quite far away and are hard to access.
- Is it possible to add projectors or screens to the perch in order to allow IASAS games or sports events like the Super Bowl to be streamed?
- Tennis courts -what upgrades are happening here? Currently some courts are two short/not up to par. The Tennis community can feel disconnected. It's hot up there. How do we help to give tennis a greater community feel?
- Will we retain the temporary fields to the north for practices? or lose the north/south fields altogether?
- How do all of the old spaces integrate into the new spaces
- Transition ease to and from the various athletics venues.
- Possibilities - lots of space for the community to come together and for parents and students who are not athletes to be able to gather and watch sport as well.
- Addresses current issue of students and parents gathering near boosters. New grandstand location puts everything in one place.
- What facilities will bring new functions for parents and students?
- Space for tennis courts on the roof top is very tight. Are tennis courts staying on rooftop. Will we have more courts after upgrade
- How will the perch be used outside of athletic purposes to make sure we're making the most out of a large space?
- How easy is it for people to sit in the perch and watch field games (would it be too far)? Will the space be conducive for student cheering and school spirit events?
- Will all the food vendors be coordinated in the F&B spaces
- Jogging track around the entire campus weaving in and out of the jungle would be an epic and unique way to pull this all together.
- Will there be projectors etc in the perch to help with viewing IASAS and other major sporting events etc?
- Can we add practice space for the golf team? Maybe putting and chipping?
- On swim race days hours are lost when there is a lightning warning- is there any plans for a retractable cover/permanent cover?
- Will the new ES building offer viewing spaces of the stadium field?
- Love the spirit hallway
- The recognition space is fantastic. This is really missing today.
- The plant barrier on the new pool side of the perch- could this be replaced with stairs/possible staggered seating blocks?
- Is there a gymnastics hall being planned for the campus?

- Are there new sports that are being added/reinstated as part of these facilities. Are any sports being dropped? Looks like swimming, with three pools going forward on campus, being upgraded/prioritized. Any other movements?
- Will there be discussions on tennis court facilities?
- Perch Food and Beverage offerings should be totally health/wellness/athletic performance related products. Create a culture of performance, fitness and wellness in this part of the campus. For athletes, and even more important, for non athletes.
- The multipurpose aspect of them. During the day, as a co-working and dining space and during athletics, as a wellness and community space
- Good food and the welcoming community
- Connections with friends
- I think that food trucks or other activities that create a more festive environment during game periods, as well as the ability to not only be there to watch the games but also connect with people. For example, being able to talk to friends in the perch while watching the IASAS soccer match on the screen.
- Connecting to the community and cheering on the Eagles!
- Opportunities to connect with other parents, give to the school and the community and support our kids- in an environment with great spaces and food options for the long day- a place where everyone can get involved
- Invite high performance sports teams to SAS to inspire our own student athletes and aspiring, younger kids

As a member of the SAS Community, what would draw you here and into these athletic spaces?

- Knowing that an event is happening.
- Meeting other families and keeping up with what's going on around campus
- Community, opportunities to gather and meet others.
- Connecting to the community - space to explore
- School spirit and pride - seeing all types coming together and cheering for kids.
- A healthful, wellness based space for connection and Eagle pride :)
- school spirit, cheering for SAS Eagles,
- Open, outdoors, lots of light and space and energy ... Vitamin D for everyone.
