

Hello,

Hope everyone is staying safe during this time! We, Annie Huang and Xuechen Yin, are the co-presidents of Westlake National Honor Society (NHS) for 2020-21. We know this time can be super challenging for students adjusting to a new learning environment and style, so Westlake NHS students are starting a program offering free tutoring to kids of all ages, including elementary, middle, and high school students.

NHS students are expected to uphold the standards of Leadership, Service, and Character that are necessary to improve the community. Additionally, they are some of the most qualified students, as most have completed and excelled in several AP classes and maintained high GPAs throughout their high school years. NHS originally started a peer tutoring program several years ago, and current NHS students have experience tutoring and helping other students in all academic subjects. After many years of peer tutoring, we wanted to expand NHS tutoring services to elementary and middle schoolers moving forward.

If you/your child would like to receive tutoring, we have attached a link to sign up. We will be matching tutors and students based on subject matter and availability. There is no deadline for signing up, so feel free to sign up at any time during the summer, during the school year, or even next year. We'll have someone reach out once you've signed up!

Link to sign up:

Again, hope everyone is staying safe and doing well!

Sincerely,

Annie Huang and Xuechen Yin on behalf of Westlake NHS
