### Biography

Welcome to South Texas ISD Preparatory Academy! I became a part of the STPA family five years ago. I am currently teaching Biology but have taught 8<sup>th</sup> Grade Science as well.

I was born in Chicago, Illinois but raised in the Rio Grande Valley. I am a Mission High School alumna, class of '98 (Go Eagles!). I received my Bachelor's degree in 2010 from the University of Texas Rio Grande Valley (was called UTPA back then). I currently live with my loving and supportive husband who is in the medical field. Both of my young adult children, are currently attending UTRGV as well. My son is pursuing an engineering career and my daughter is interested in the medical field. I am very proud of my small family and all their accomplishments.

Being a teacher has been a very rewarding profession. I still remember the words that were said to me on my first year of teaching, "Don't worry. The years will go by quick!" They sure did! I intend to stay in the educational field for a very long time. I truly feel that teaching is my calling and enjoy every second of it. I am truly blessed.
