LA PORTE ISD LAUNCHES COVID-19 DASHBOARD

La Porte Independent School District this week launched its COVID-19 Dashboard, a graphic tool intended to keep stakeholders updated on the number of confirmed COVID-19 student and staff cases in the district.

The dashboard lists current and historical COVID-19 information – districtwide and by facility – and is updated weekly, or as new confirmed cases might arise. It is posted on the district’s website.

“We believe it is a priority to keep our stakeholders informed, and our dashboard provides a transparent look at the most current COVID-19 statistics in La Porte ISD,” said Angela Garza-Viator, La Porte ISD executive director of human resources.

District officials opted to create the dashboard after the Texas Education Agency mandated that school districts submit COVID-19 case data weekly to its office. The agency does not require districts to report the data to the public.
