

School Board President's Report

Sarah Olbrich, President

August 17, 2020

Good evening. I know it has been a long summer spent imagining what the next school year will look like. I want to thank you for your patience and your feedback. Now that we know our path forward, my hope is that we all come together to focus on preparing our children for the start of school on August 31. Though it will be a different first day than what we have come to expect, this pandemic will not prevent teaching and learning to begin again between our children and their teachers. It is time for us to give them the space and support to do the work at hand. I want to wish everyone a great first day of school. Thank you.
