

Parent Remind Accounts

Widefield School District 3 (WSD3) has integrated the use of Remind to support teacher, school, and district communication. Remind accounts for parents are automatically created based on information provided by parents in Infinite Campus (IC).

If you are not receiving Remind communication from teachers, schools, or the district, that could be due to a multitude of reasons. This document is to support you in accessing, merging, or improving your Remind experience.

The FIRST thing you should do is make sure you have an active IC Parent Portal account. If you do not know if your account is active or if your contact information is updated, please email ichelpdesk@wsd3.org.

If you DO have an active IC Parent Portal account and you DO know what contact information is provided in IC, then you can follow the instructions below to access your account.

If you had a Remind account prior to this year, have a Remind account that is used with other programs outside of WSD3, or downloaded the app and created a Remind account, you might need to merge your accounts.

How to Access your Remind Account

To access your Remind account, it is preferred that you log into Remind using a computer, not a phone as the first step (*you can use your phone with the app after your account has been accessed for the first time*).

Log into Remind.com using your email address or phone number that is associated with your IC Parent Portal.

If you don't know the password, click "Forgot" and follow the instructions.

Once you are in, you should see that you are now connected to Widefield School District 3, your child(ren)'s school(s), and your child(ren)'s classes. If you are asked to join with a class code or similar, this means that the email or phone number just used to log in is NOT the contact information associated with your Remind account. You should try a different phone number or email that could be associated with your IC Parent Portal.

If you do not see your child(ren)'s classes and it doesn't ask you to join with a class code, then you will want to follow the "Merge" instructions below.
