Opioid Overdose Prevention (Emergency Administration of Naloxone)

The Board of Education (Board) recognizes that many factors, including the use and misuse of prescription painkillers, can lead to the dependence on and addiction to opioids, and that such dependence and addiction can lead to overdose and death among the general public, including District students and staff. The Board wants to minimize these deaths by the use of opioid overdose prevention measures.

Definitions

Drug overdose means an acute medical condition, including, but not limited to, severe physical illness, coma, mania, hysteria or death, which is the result of consumption or use of one or more controlled substances causing an adverse reaction. The signs of opioid overdose include unresponsiveness; nonconsciousness; shallow breathing with rate less than 10 breaths per minute or not breathing at all; blue or gray face, especially fingernails and lips; and loud, uneven snoring or gurgling noises.

Naloxone (Narcan) means a medication that can reverse an overdose caused by an opioid drug. As a narcotic antagonist, Naloxone displaces opiates from receptor sites in the brain and reverses respiratory depression that usually is the cause of overdose deaths.

Opioid means illegal drugs such as heroin, as well as prescription medications used to treat pain such as morphine, codeine, methadone, oxycodone (OxyContin, Percodan, Percocet), hydrocodone (Vicodin), fentanyl, hydromorphone (Dilaudid), and buprenorphine.

Delegation of Responsibility

The school physician/School Medical Advisor shall provide and annually renew a standing order for the administration of Naloxone to students, staff members or other individuals believed or suspected to be experiencing an opioid overdose on school grounds or at a school-sponsored activity. The standing order shall include at least the following information:

1. Type of Naloxone (intranasal and auto-injector)
2. Date of issuance
3. Dosage
4. Signature of the school physician/School Medical Advisor

The Board directs the school physician/School Medical Advisor to issue a non-patient specific order to District school nurses to administer Naloxone (also known as Narcan, among other names) for the purpose of emergency first aid to students or staff who do not have a prior written order from a qualified medical professional for the administration of Naloxone. The non-patient specific order shall include a written protocol containing the elements required by the regulations of the Department of Consumer Protection.

Opioid Overdose Prevention (Emergency Administration of Naloxone)

Delegation of Responsibility (continued)

The Board permits school nurses to administer Naloxone to any person at school or a school event displaying symptoms of an opioid overdose. The District will store the Naloxone kits in the secured nurse's office. Naloxone shall be accessible during school hours and during on-site school-sponsored activities.

Acquisition, Storage and Disposal

Naloxone shall be safely stored in the school nurse's office or other location designated by the school nurse in accordance with the drug manufacturer's instructions.

The school nurse shall obtain sufficient supplies of Naloxone pursuant to the standing order in the same manner as other medical supplies acquired for the school health program. The school nurse or designee shall regularly inventory and refresh Naloxone stocks, and maintain records thereof. In accordance with internal procedures, manufacturer's recommendations and any applicable Department of Public Health guidelines.
