

Scratch 3.0

Offered to Grades 3, 4, & 5
Coding is the new literacy!

What is Scratch?

A new generation of Scratch that expands how, what, and where kids can create with code. With Scratch extensions, you can keep adding new coding blocks to Scratch. Scratch is a block-based visual programming language and website targeted to help children learn code. The service is developed by the MIT Media Lab. Scratch 3.0 is designed to work in any current browser and on a wide variety of devices — including touch devices like tablets.
