

ScratchJr

Offered to Grades 1 & 2
Coding is the new literacy!

[What is ScratchJr?](#)

[Learn more!](#)

With ScratchJr, young children (ages 6 & 7) can program their own interactive stories and games. In the process, they learn to solve problems, design projects, and express themselves creatively. Children snap together graphical programming blocks to make characters move, jump, dance, and sing. Children can modify characters in the paint editor, add their own voices and sounds, even insert photos of themselves - then use the programming blocks to make their characters come to life.
