NOTICE OF ABATEMENT WORK

Dear Parents and Staff of Joliet High School District #204

During the past years, School District No. #204 has made a conscientious effort to identify and remove asbestos containing materials from its school buildings. To that end, we have made considerable strides. These removal projects are consistently tied to renovation projects or will surface as a specific project when unknown material is found within concealed areas during an ongoing project.

Joliet West High School will be removing asbestos containing flooring materials to facilitate the renovation of the LRC. The abatement project is scheduled from October 1, 2020 through October 9, 2020. Asbestos containing flooring materials are documented in the Old Computer Lab. These materials will need to be removed prior to any other work proceeding, following all regulatory laws pertaining to A.H.E.R.A. (Asbestos Hazard Emergency Response Act), IDPH and EPA's NESHAP regulations.

The work areas will remain closed to all parents, students and staff during the duration of this removal project.

Please feel free to contact Joe Lopez, Director of Buildings and Grounds, 815/325-3168 with any questions related to this work.

Thank you,

Joe Lopez
Director of Buildings and Grounds
Joliet Central High School District #204
