2020-2021

Philosophy: The staff at Harmony Elementary School is committed to the ideal that all children can learn. We believe that success in learning leads to success in life. Harmony Elementary is focused on STEM Agriculture Education taught through problem based learning in Kindergarten through 5th grade. Success will most likely occur in an effective school with a safe and orderly environment. Policies, procedures, and rules are necessary to maintain that environment. They also promote the greatest opportunity to learn and the maximum time spent on the learning process. Our rules and procedures are outlined in our handbook for students. We intend to be fair, firm, and caring as we enforce them without regard to race, sex, or handicapping conditions and with due respect for the dignity and rights of each student.

All students are expected to follow all rules and policies and to obey the instructions of any school staff member at any time. The principal, teachers, and staff members will enforce these policies in order to maintain the safe and orderly environment to which we have committed.

Parents are asked to be familiar with school policies and help us by following those which require their support and by reinforcing the rules which students need to follow. A positive home, school, and community relations is a major goal for our staff and is essential to creating an effective school. We sincerely solicit and appreciate parent support.

Vision: Harmony Elementary strives to exceed expected growth for all student by promoting Science, Technology, Engineering, Math and Agriculture (STEM-Ag) education through Problem Based Learning. In our classrooms, we create a nurturing environment where all students collaborate, problem solve, and innovate. We strive to produce problem solving students who aspire to be successful in their community.

Mission: Harmony Elementary School will work as a team using STEM-Ag Education to meet and support the needs of all learners while developing curious and responsible students.

Core Values: Performance excellence is driven by requirements, high student expectations, customer needs, decisions based on data, alignment of goals and systems, and research based best teaching practices. Continual improvement must engage staff and community.
