

Math Olympiad

Grades 4 - 8

The Math Olympiad program includes two teams, Grades 4 – 6 and Grades 7 – 8. Both teams will meet each Tuesday morning (7:45 – 8:25), beginning on **October 1st** through mid-March. Math Olympiad students will enter school at the cafeteria Before Care door. Room locations TBD.

Math Olympiads for Elementary and Middle Schools is a nonprofit foundation that provides math contests and gathers results. The students participate in five contests, the first being held in early November. The contests are done at the school, and the results are reported to Math Olympiad. Last year, 150,000 students from about 5,000 worldwide teams participated in the Olympiads in the elementary and middle school categories. All 50 states and 25 countries were represented.

Students will meet each week to work on practice contests, puzzles, and learn math fun facts, such as a very simple way to know if any number is divisible by 3. These “practice mornings” problems are done in pairs or groups of their own choosing. They are then reviewed by the students and leaders for everyone’s benefit. At the contest, each student completes the contest individually within a time frame (30-35 min for 5 problems/puzzles). Each student who participates in 3 or more contests will receive an award in June. If you have other questions, check out Math Olympiads website at www.moems.org

Important: If school is cancelled or delayed on a Tuesday, Math Olympiad follows and is cancelled or delayed accordingly. Before Care is available for siblings.
