GRADE 6

NEW HANOVER COUNTY SCHOOLS FAMILY LIFE EDUCATION COURSE DESCRIPTIONS

The mission of the Family Life Education Department is to provide a medically accurate and age appropriate human development and sexuality education that encourages parent/child communication, promotes abstinence and enables students to make responsible decisions regarding their health and sexuality.

All New Hanover County middle school students are offered the choice of ONE Family Life Education course: *My Life: Choices Today for a Healthy Tomorrow* (abstinence-until-marriage) or *Stepping Stones to Better Living: Responsible Decisions* (abstinence-based). These courses are taught during the students' regularly scheduled PE/Health course. **Parental consent is required for either course.**

My Life: Choices Today for a Healthy Tomorrow – Grade 6 (Boys: 7 days; Girls: 7 days)

My Life is an abstinence-until-marriage reproductive health and safety education course that promotes optimal health outcomes for pre-teens as they transition from adolescence into adulthood. *My Life* builds on information learned in the lower grades, guiding students in realizing the long-term health benefits of abstinence while enhancing the family's role as the primary sexuality educators of their children and encourages family discussion on the course topics, which are:

(** = boys/girls are separated for these topics)

- Goal setting and benefits of abstinence
- Friendships and decision making
- ****Male & female reproductive anatomy and physiology (includes human reproduction)**
- ****Puberty: changing bodies & minds***
- ****Menstrual cycle and menstruation (girls only)***
- Assertive communication and refusal skills
- Personal safety and technology in today's changing world
- Sexual harassment and abuse (definition and recognition)
- Questions and answers (anonymous "Question Box")

Stepping Stones to Better Living: Responsible Decisions – Grade 6 (9 day course)

In *Stepping Stones* abstinence is stressed as the only 100% effective way of preventing teenage pregnancy, sexually transmitted diseases (STDs), and the human immunodeficiency virus (HIV).

Boys and girls are separated for the entire course. The following information is covered:

- Personal traits, strengths and interests that enhance self-esteem
- Physical changes associated with puberty
- Male and female reproductive systems (includes human reproduction)
- Gender Roles and Sexual Orientation introduction
- Abstaining from drugs and sexual intercourse – a positive choice for healthy development
- Conception and fetal development (including how multiple births occur)
- Childbirth
- Abstaining from drugs and alcohol – a necessary choice for the development of a healthy baby
- Resources available for health concerns (family, school, clergy, community resources, etc.)
- Abstaining from sexual intercourse, intravenous (IV) drug use and/or needle sharing – most effective ways to protect oneself from HIV infection

**Contact information for the teachers can be found at www.nhcs.net/familylife/
Parents may also review the curricula in the office of their child's middle school.**
