THE KAUST SCHOOL IMMUNIZATION REQUIREMENTS FOR K-12

VACCINEC	at bottom of page)	DECIJIDED FOD 1/2	NOTES
VACCINES	REQUIRED FOR K1 & K2	REQUIRED FOR K3 Required: 5 doses DTaP/DTP, the	
*Diphtheria, tetanus and acellular pertussis (DTaP)	4 doses by age 2	student must receive dose five on or after his/her 4 th birthday Acceptable: 4 doses DTaP/DTP <i>IF</i> the student receives dose 4 on or after his/her 4 th birthday.	student received the last dose before his/her 4th birthday, the student must have a final dose after age 4 years. Dose 5 i not required if the student received dose 4 on/after his/her
*Polio (IPV or OPV)	3 doses by age 2	Required: 4 doses, the student must receive dose four on or after his/her 4 th birthday Acceptable: 3 doses <i>IF</i> the student receives dose 3 on or after his/her 4 th birthday.	 The final dose in the series should be administered on or after the student's 4th birthday and at least 6 months following the previous dose. If the 4th dose is administered before age 4 years, an additional dose is required. A 4th dose is not necessary if the 3rd dose was administered on/after his/her 4th birthday and at least 6 months following the previous dose.
*Haemophilus influenza type b (Hib)	4 doses (see notes)	Not given after 5 years old	 Typical vaccine schedule: 2,4,6, 15 months; the final dose should be given at 12-59 months 3 doses required if: 2 doses were given before 12 months then a 3rd dose should be given at 12 – 59 months 1 dose was given before 12 months and the second dose was given before 15 months then a 3rd dose should be given 8 weeks later 2 doses required if: 1 dose was given at age 12-14 months then a second dose should be given at least 8 weeks later 1 dose required in previously unvaccinated children age 12-59 months
*Measles, Mumps, and Rubella (MMR)	1 dose	2 doses	2 nd dose must be given at least 4 weeks after the 1 st dose
*Varicella (chickenpox)	1 dose	2 doses	2 nd dose routinely administered between 4-6 years but may be administered before age 4 if it is given at least 3 months after the 1 st dose.
*Hepatitis B	3 dos	ses	2 nd dose in 1-2 months after 1 st dose. 3 rd dose 8 weeks after 2 rd AND 16 weeks after 1 st . The last dose must be after age 24 weeks.
*Meningococcal ACWY	1 dose required for previously unvaccinated students		 Typically a 2 dose series administered 8-12 weeks apart as an infant between 9-12months; 1 dose required for previously unvaccinated children In addition, the following is HIGHLY RECOMMENDED: 2nd dose at least 3 months after the first
+Hepatitis A	2 dose s	series	2 dose series administered at least 6 months apart
^Influenza	Year	•	
VACCINES	REQUIRED FOR GRADES 1-5	REQUIRED FOR GRADES 6-12	NOTES
*Diphtheria, tetanus and acellular pertussis (DTaP) and *Tetanus, diphtheria, and acellular pertussis (Tdap)	Required: 5 doses DTaP, the student must receive dose five on or after his, 4th birthday (see above DTaP Schedule Acceptable: 4 doses DTaP IF the student receives of 4 on or after his/her 4th birthday For students aged 7 years and up, 3 doses may complete the series of which one dose should be Tdap.	Same as Grade 1-5 Entry AND 1 dose Tdap booster for 6-12 th	 Same as K 1-3 Section, Above For students who did not receive the full infant series of diphtheria, tetanus, and acellular pertussis as an infant, DTaP is appropriate as a catch-up vaccine until age 6. Students age 7 and up should receive Tdap or Td to meet the required number of doses.
*Polio (IPV or OPV)	Required: 4 doses, the student must a 4 th birthday or 3 doses <i>IF</i> the student birthday.		
*Polio (IPV or OPV) *Measles, Mumps, and Rubella (MMR)	4 th birthday or 3 doses <i>IF</i> the student	receives dose 3 on/after his/her 4 th
