This data reflects a response rate of 69.9% of the population. These data are pulled from the raw results of the Return to School Family Survey sent a few weeks ago. There were multiple submissions by some respondents as well as inaccurate reporting of grade levels of some students. The data set has been scrubbed with duplicate entries and inaccurate building/grade submissions updated and/or removed.

Generally, the duplicates or inaccurate school reporting was due to the following:

- Parents selected Royersford ES likely confusing school with town.
- Parents selected prior school instead of the new one (for example, a parent/guardian of a 5th grader chose Oaks ES instead of the 5th/6th Grade Center).
- Many had 2 entries a few seconds apart from each other suggesting a concern that the entry didn't submit.
- Several student IDs had 3-4 entries per the same student.
