

growth

Our school embraces the Carden Instructional Method developed by Mae Carden, which is currently used by over 80 schools nationwide and internationally. Our students are taught organizational skills and study habits that enable them to achieve the highest academic standards. True to Mae Carden's vision, we teach our students to question and hone their own ideas, and to problem-solve and think critically.

"CARDEN set the foundation for my daughters. This has enabled them to excel in high school. My oldest daughter has been granted early acceptance to the college of her first choice. Without CARDEN and the dedicated faculty, this would not be our current reality.

Thank you!"
