

Primary Grade Levels First through Fifth

At the heart of the Carden Instructional Method is a vital educational philosophy with proven teaching techniques. Our elementary program, first through fifth grades, ensures that each child receives a well-developed and articulated program. Small class sizes, even smaller instructional groups, additional support staff, and specialist teachers enable us to provide each student with a thorough instructional program.

Learning a foreign language is an important component in a well-rounded education. A CARDEN student's first exposure to French begins in kindergarten. Proficiency accelerates with the layering of reading, writing, and grammatical instruction from first through fifth grade.

“CARDEN sets the groundwork for children’s learning to unfold as it should. The Carden Instructional Method and philosophy are really the biggest parts of why we chose this school. The curriculum is very rich and beautiful. They don’t just brush over the surface; things are discussed in depth.”
