

# Mad Science

Offered to Grades 1 – 5; English Only.

MAD SCIENCE has been running After School programs at GWA for over 5 years! Our content is designed to spark kids' interest in science, so that they learn without even realizing it! With the on-going pandemic, we strive to provide not only an awesome experience, but content that can also be self-guided by students to offer parents a much-needed break from the rigorous requirements of managing their child's learning. As a plus, students get to take home a different Mad Science educational science-themed toy at the end of every class. Each toy is designed to demonstrate and build on the scientific concepts they learned that day.
