

# Course Description

## Course Name: Extended Project Qualification

### Course Description

Students will plan, research and create:

- a 6,000 word dissertation
- a Production Log
- and a presentation of results

### Assessment

The assessment covers both the process and the end product, including how well students identify and use resources, carry out research, develop their ideas to realise an outcome and then reflect on the outcome and the process.

This is an independent piece of research and analysis. It is a Level 3 qualification equivalent to half an “A” level. EPQ is graded, and carries the same UCAS points as an AS level except that an A\* grade is available.

### Additional Information

Many universities support the EPQ and it may be part of their offers. The EPQ is recognised by all Russell Group universities because it seeks to develop skills and approaches to study that will be of great value to university study.
