UWO Extension 4H with 3rd Grade

The 3rd graders at Roosevelt Elementary were able to participate in fun STEM lessons through virtual meetings with Sarah Thompson! They loved getting to interact with her and learn more about 4H. One of the activities that they did was to build a tower out of spaghetti noodles, string, and masking tape that would support a marshmallow at the top. It was harder than it seemed, but we figured out how to do it! Try it at home and see if you can do it too!
