STUDENT SMARTCARD ID
TAP AND GO

At a basic level, 'Smartcard ID' allows students in Years 3-12 access to borrow from the library or to print student work at any printer on either of the Wolaroi or PLC campuses using 'tap and go' functionality. The Smartcard Student ID also serves as a form of photo identification where a student is required to provide such proof of identity.

ACCESSING THE 'CASHLESS CANTEEN'

Linking the Smartcard ID with the 'FlexiSchools' system allows students to make purchases from the Canteen without the need to carry cash. The Smartcard ID can be 'loaded' with value and purchases automatically debited from the account. In time, the School will move to a completely 'cashless' canteen service for all students. For the moment, the use of the cashless component of the canteen will be optional, but I believe the functionality will assist families by reducing the need for students to carry cash on campus.

Boarding students are also able to access the cashless canteen service using a FlexiSchools account linked to their Smartcard ID.

SETTING UP A FLEXISCHOOLS ACCOUNT

In order to access the Cashless Canteen it will be necessary to establish a FlexiSchools Account and link that account to each Smartcard. You will need to associate your child's KWS StudentID number with your Account. The StudentID number is not printed on the card and may be provided by the ICT Service Desk in the Library open 8am till 4pm on School days.

The School continues to look for ways to improve services and reduce cost burdens on families. If you require any further assistance in setting up the FlexiSchools account please contact FlexiSchools 1300 361 769 or help@flexischools.com.au.
