

Burr District Elementary School

Our Vision

At Burr District Elementary School we will value, nurture and enhance our relationships through collaboration and communication among students, staff, and community members.

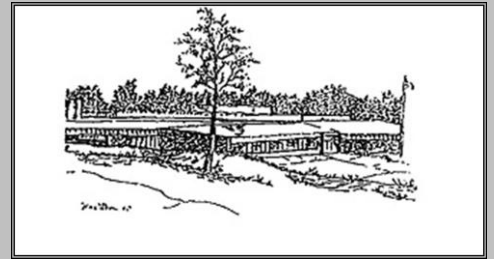

Staff will develop a flexible and creative environment in which students will have choices and develop their interests.

We will cultivate critical thinking and reflection through authentic experiences using technology and other available resources to support learning and creativity.

The community will respect, develop and celebrate our children's interests, talents, and differences.

We will empower our children to become productive and engaged members of our ever changing society.

Excellence Starts Here

At BES we value:

Teamwork: collaboration among staff, students and families to share ideas, knowledge and interests.

All children unconditionally: their input, abilities and intelligences.

Problem solving abilities with real world applications.

Choice: freedom to pursue different interests using all available resources.

Risk taking and divergent thinking

Intrinsic motivation to pursue their passions for purposeful learning.
