

Hello Families of Kindergarten and First Grade Students,

Every year, at the beginning of the school year, we ask kindergarteners and first graders to do a small series of reading and math tests. These tests are universal screening measures provided by Fastbridge. These tests are done individually. These tests measure kindergarten and first grade reading and math foundational skills. Getting accurate results is important to our district which means that in-person testing would be much better for K and 1.

We will do in-person testing on October 21st. You will use the same sign-up tool you used to attend conferences to come to student in-person testing. Please come on time because the testing will take the amount of time we have scheduled. This is independent-study Wednesday, so your student will not be missing a live conference.

Because of social distancing recommendations, our waiting area will be outside under the covered play area. This means, while you wait, you will be dry, but will also need to dress for the weather.

Kindergartners will also be able to pick up their packets to accompany live conferences.

Thank you in advance for signing up and bringing your child!
