

Why try Ski Racing?

Ski Racing catapults students into a world of adventure, drama, physical endeavour, teamwork, performance and companionship. It is fast, furious and highly technical, but once mastered the rewards that come with ski racing are immense.

Who can do it?

Any student can join the Ski Racing team although it is usually intermediate to advanced skiers who wish to advance their technique.

Highlights from 2019-20

- The Millfield race team competed at the British Schoolboys Races in Wengen, Switzerland in January
- At the BSR, Thomas Holmes was awarded the BASI Trophy, for the racer who best encapsulates the spirit of skiing

Looking forward to 2020-21

- Competing at the annual races held in Flaine, Wengen and Pila with the ski race teams, after a disrupted 2020 season
- Encouraging higher numbers of girls into the ski race team
- Expanding the Athletic Development provision for all skiers
- Attending more UK-based ski competitions

High performance

We enjoy close links with the major British Ski Race Academies, so high performers are supported when away from school at training camps or competitions. Slalom training is available twice a week along with strength and conditioning sessions.

Success stories and future stars

Brothers Harry and George Black are ranked in the top five in the European rankings for U14 and U16 respectively, after competing for Great Britain in the Anglo Scottish Ski Championships in Pila, Italy and the English Ski Championships Children's Races.

Good Luck to all skiers for next season and thank you to the departing ski captains, Ben Hoskings and Thomas Holmes, for the past five years of positive support and performance.
