

# WATCH YOUR DISTANCE!

Wearing your mask, washing your hands, and watching your distance can help prevent the spread of COVID-19. Safe distancing means staying at least 6 feet away from anyone who does not live in your household. While we do have safety protocols in place at all of our buildings and sites, safe distancing will look different with students returning to in-person learning.\*

## What does 6 feet look like?

It will be important for parents to talk to their children about all of the “3 Ws,” but it is likely that safe distancing will be challenging for students in all grade levels. It will be hard for children to not hug their friends and teachers and to maintain distance with groups of friends that they have not seen since March. We encourage you to talk with your children about other ways to greet their friends from a safe distance.

**WEAR WASH WATCH**  
STAY SAFE AND HEALTHY. YOU CAN HELP PREVENT THE SPREAD OF COVID-19!

\*Adults in our buildings will be expected to manage their distance, and we will maintain as much space as we can when students are in classrooms or moving throughout the building.
