

Household Next Steps While Waiting for COVID Results

In an effort to further decrease the spread of illness in our school community, we will start asking our School District of Elmbrook staff and families to begin the process of isolating everyone in the family if anyone in the household is undergoing Covid-19 testing, whether it be related to Covid suspect symptoms or a Covid-19 exposure.

Students and staff may return to school when written negative test results are received at their respective schools.

However, please be aware if you are identified as a “close contact” due to a Covid-19 exposure, a negative test result will not eliminate the need to complete your 14 day quarantine. You will still need to complete your quarantine as directed by your local Health Department.
