

AMAZING THINGS ARE IN STORE FOR YOUR CHILD IN LINCOLN'S LOWER SCHOOL!

Technology: We seamlessly integrate technological concepts into our curriculum to raise confident digital natives. Whether it's using Kibo robots and screen-free coding, or utilizing computational thinking, Lower Schoolers are well prepared for a tech-savvy world.

Research Techniques: At Lincoln, students embrace curiosity to deepen their sense of the world and their place in it. From Wonder Time, to using Google's Genius Hour techniques, to developing an understanding of media literacy, students learn to navigate multiple sources to test complex theories.

World Languages: Starting with our littlest learners, students speak Spanish or French to learn about each other and discover different aspects of unique cultures around the globe! Language lessons come in many shapes and sizes, from food, literature, traditional dances and songs, field trips, and more!

In the Field: Lincoln's campus isn't defined by four walls. From adventures with The Studio, to tending to our edible garden, to exploring the Ocean State through experiments and our partnership with Save the Bay, Lower Schoolers get hands-on while venturing out into our community.

Social Emotional Experience: We emphasize independent learning that fosters confidence and helps to develop a growth mindset. Our students know they are respected as individual learners while also gaining a deep understanding of their larger role in both class and the greater society.

Service and Leadership: We teach the value in acting as an example to others and always giving back. From our support of refugees through the Syria Project, to making pins for Lincoln's Community Action Day, to spending time with friends at Bethany Home Assisted Living, students learn the building blocks for lifelong resilience and responsibility.

Quaker Values: We integrate the Quaker SPICES (Simplicity, Peace, Integrity, Community, Equality, and Service/Stewardship of the Earth) in all aspects of our daily lives. During Friday Silent Meetings, students have time to reflect and connect with community; in all grades, students work together to make a positive impact on our environment; and woven into our curriculum are the Quaker values of peace, equity, and inclusion.
