The Blue Lagoon

Discover Iceland with Visions in Education

Few visitors can travel around Iceland without being deeply touched by its sheer beauty, and few can leave the country without a strong vow to return. It's just that sort of place. Perched on the edge of the Arctic, this wonderful little island contains some of the most impressive natural wonders in Europe.

The continent's biggest waterfalls thunder down with such force that the ground trembles under your feet; the barren highlands form Europe's largest, loneliest desert; and the awesome ice cap Vatnajökull is the biggest outside the poles.

Other spectacular phenomena include smoldering volcanoes, slow-flowing glaciers, extruding lava, gushing geysers, bubbling mud pots, soothing thermal pools and, in the darkness of winter, the magical northern lights.
