## **Enrollment and Capacity Management Advisory Committee (ECMAC)**

2019-2020 Year-End Review Notes

#### Overview

The Enrollment and Capacity Management Advisory Committee (ECMAC) met 8 times during the 2019/2020 school year to continue to work on making observations and recommendations about enrollment and capacity related items. Because of the COVID-19 pandemic that occurred starting in March of 2020, the final two ECMAC meetings of the year did not occur. This resulted in the inability to collaboratively create a final Summary of Progress (SOP) for the work that occurred, as was done in previous years. Therefore, this document is intended to summarize the work that occurred during the year in lieu of a formal SOP.

#### Purpose

The purpose of the Enrollment and Capacity Management Advisory Committee (ECMAC) is to increase community trust in long-range planning for enrollment and building use. The ECMAC analyzes information affecting enrollment, capacity, and building use, and generate observations and recommendations to be communicated to district administration.

#### **Guiding Principles**

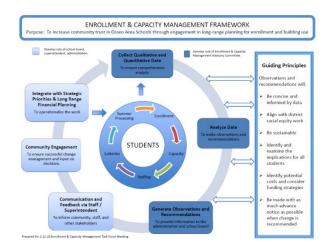

Observations and recommendations from ECMAC will:

- Be concise and informed by data
- Align with district racial equity work
- Be sustainable
- Identify and examine the implications for all students
- Identify potential costs and consider funding strategies
- Be made with as much advance notice as possible when change is recommended

### **ECMAC Background**

With the intent of increasing transparency and communication between Osseo Area Schools and the communities it serves, a task force of parents, school district staff, and community members was assembled in 2015 to create a framework to identify, analyze, and communicate issues related to enrollment and facility management and use.

After an 18-month study of the elements that affect facility use, the task force recommended the district adopt the framework illustrated in the figure to the right.

Integral elements of the framework are:

(1) the establishment of an Enrollment and Capacity Management Advisory Committee (ECMAC) to study facility management and report observations and recommendations to administration, and (2) the creation of "Guiding Principles" upon which ECMAC would rely. The district adopted the framework in the spring of 2016 and the first ECMAC meeting was held on August 22, 2016.

In April 2019, ECMAC presented a final Summary of Progress report to Interim Superintendent Jim Bauck. This report included observations and recommendations that emerged from ECMAC's third year of work to study enrollment management and building use. ECMAC made several recommendations related to enrollment and capacity, including the following elements:

- Have staff continue to determine and evaluate the impact and implications of the options that were identified to address over-capacity conditions at the elementary level
- Have staff research and design option(s) to address over-capacity conditions at the secondary level
- Have staff continue to work with the City of Maple Grove to better understand the timing of the future housing development in the NW area of the school district

As part of the comprehensive Integrated Facilities Planning Process that was developed by the district in the spring of 2019, ECMAC was charged with bringing forth observations and recommendations to address over-capacity conditions at buildings across the district by December of 2019.

### ECMAC 2019/2020 Review

Throughout the 2019/2020 school year, ECMAC conducted eight meetings to meet the Integrated Facilities Planning Process deliverable timeline. The 19/20 year membership included 24 community members, 12 staff members, 2 school board members and an industry expert from Wold Architects (Appendix A).

Throughout the course of the meetings, extensive data analysis occurred. Elementary and secondary assumptions (Appendix B) were created by the district's teaching and learning team in conjunction with building leadership. These assumptions were applied to each building to determine the overall capacity. In addition, based on school board direction at the August 13, 2019 work session, a standard calculation using "targeted class sizes," which is the same method used in staffing allocation, was determined for all capacity calculations.

As part of its district-commissioned work to assess the district's magnet school programming, Magnet Schools of America (MSA) also studied the feasibility of an option that had been identified by ECMAC as a potential solution to over-capacity conditions at the elementary level. That option was to move the STEM program from Weaver Lake Elementary to Oak View Elementary, and make necessary boundary changes. In a presentation to ECMAC on September 23, 2019, as well as to the school board at the October 8, 2019 work session, MSA recommended leaving the highly successful STEM program at Weaver Lake Elementary and consider other options to address over-capacity conditions at specific elementary schools. As a result, the option to move the STEM program from Weaver Lake Elementary to Oak View Elementary was removed from consideration.

The data that ECMAC uses to determine which schools are over or under capacity is based on November 1<sup>st</sup> enrollment of each year. There are several sets of data that ECMAC reviews, including enrollment variance from year to year, enrollment variance from projections, enrollment versus capacity, and enrollment compared to the MDE recommendations for core space capacity (Appendix C). Through this data analysis, ECMAC and district staff developed options to be considered to address over-capacity conditions at identified schools.

As options were identified and reviewed by ECMAC, specific data was analyzed and observations were made. The data provided for each option included the potential number of families impacted, the estimated cost associated with each option, the construction and implementation timeline of each option, and the potential funding source (Appendix D).

### **ECMAC Observations**

The data analysis process resulted in a number of observations and findings. At the elementary level, Rice Lake continued to be over capacity based on enrollment data from 19/20 and throughout the 5-year projection. While Basswood continued to be over capacity, the enrollment projection showed a decline and the school is predicted to be below capacity within the 5-year projection window. Garden City Elementary is currently below capacity and the projection has it slightly over capacity within 5 years, but not to the level that would require an immediate consideration of relief. Finally, Fernbrook Elementary is expected to be over capacity within the 5-year projection when the estimated new housing growth is factored in.

At the secondary level, Maple Grove Senior High is currently over capacity, and is projected to remain there throughout the 5-year projection. In addition, all three comprehensive senior high schools are projected to be over capacity for cafeteria space according to MDE recommendations. Park Center Senior High is projected to be over capacity for media space according the MDE recommendations.

As part of the data analysis process, ECMAC reviewed funding mechanisms for the various options they were considering. If an option were recommended that included an addition(s) at the

elementary level, either bond referendum proceeds or lease levy funding could be utilized. For the secondary solutions as well as building a new elementary school, a bond referendum would be required.

Along with the observations and findings, ECMAC had a number of questions and some feedback related to the options they were considering. A Q&A document was developed and distributed to ECMAC members at their December 9, 2019, meeting (Appendix E) for both elementary and secondary buildings. In addition, a number of questions surfaced that were outside the scope of the work of ECMAC, including concern about the base assumptions and how the unique needs of a building are addressed (specifically Garden City Elementary), what career/tech ed will look like in the future and how that may impact capacity, and how media center spaces will be used in buildings and how that might affect capacity. These concerns were forwarded on to working groups and district administrators that are working through some of those same questions.

### **ECMAC Recommendation for Building a Better Future**

ECMAC considered four options to address over-capacity conditions at Rice Lake Elementary School and Fernbrook Elementary (Appendix F). They also considered one option to address over-capacity conditions at the three comprehensive high schools (Appendix G). For each option considered, ECMAC members made obervations about what they liked about the option, what were the drawbacks/challenges, how the community might respond to the option, how the option aligned with ECMAC's guiding principles, and what alterations they would recommend to strengthen the option. These comprehensive observations for the elementary and secondary options are included in Appendix G.

After observations were complete, ECMAC used the December 9, 2019, meeting to determine recommedations that would move forward to the Oversight Task Force for further consideration. Group members unanimously eliminated two elementary options (Oak View Addition and Weaver Lake Addition) and were split with support for the Rice Lake Addition option and the New Elementary option. The group also unanimously supported recommending the Secondary Option.

The group that supported the Rice Lake Addition option was asked to compile answers to the following questions: why they chose this option, what will make it successful, what are the positive and negative implications, and what are considerations that should be suggested to the Oversight Task Force. The same request was made of the group that supported the New Elementary Option. The results of this work is indicated in Appendix H. The group then came back together and collectively worked through each question. There was constructive dialogue around both options, and ultimately neither group was swayed to the other option. At the

conclusion of the meeting, ECMAC unanimously supported moving both elementary options (Rice Lake Addition and New Elementary) to the Oversight Task Force for further consideration.

ECMAC's findings and recommendations to address over-capacity conditions in the district were presented to Superintendent Cory McIntyre and the school board at a work session on January 14, 2020. Additionally, the information was provided to the Oversight Task Force as part of the Building a Better Future process to determine comprehenisve facility needs and recommendations to address those elements.

#### January 21, 2020 ECMAC Meeting

Once the observations and recommendations were made to address over-capacity conditions in the school district, ECMAC spent its final meeting of the year hearing from our student services and community education leadership teams about the facility challenges they face, as well as making observations related to under-capacity conditions at schools in the district. While there was concern expressed about schools that were more than 10% under-capacity, there was not consensus with the group on whether any recommendations should be made to address those situations.

#### **COVID-19 Related Cancellations and Impact**

After the January 21 meeting, ECMAC had two remaining meetings left for the 2019/2020 year schedued for March 23 and April 13. Typically, these two meetings would be spent assembling and reviewing the year-end Summary of Progress report. Because of the pandemic, the school district shifted to a distance learning format for the remainder of the 2019/2020 school year, which precipitated the cancellation of the remaining ECMAC meetings. This year-end review is designed to replace the SOP for the 2019/2020 work for one year only. The traditional SOP will resume to summarize the work of the 2020/2021 ECMAC.

### **Elementary Assumptions:** Assumptions to be used for elementary target capacity analysis.

In addition to appropriate grade-level classrooms, all elementary schools need the following spaces:

Student Cafeteria Kitchen Staff Cafeteria Administrative Offices Staff Offices	<ul> <li>Special Education</li> <li>Resource: 2 classrooms per school depending on # of student identified</li> <li>Self-contained classroom space: keep existing space</li> </ul>	Music Room: 1-2 rooms depending on student enrollment see note	<ul> <li>Academic Support Services</li> <li>Academic Intervention: up to 1 room</li> <li>Talent Development Academic Challenge and Gifted (TAG): up to 1 room</li> </ul>
Media Center	allotments for center-based special education classroom programs, including Connect, Skills, Strategies, DHH and	Pre-kindergarten 4-year old programming: 2 classrooms per school see note	<ul> <li>depending on # students identified</li> <li>Title 1: 1 classroom (CV, FO, GC, PL, PB, ZW)</li> </ul>
Custodial (storage, supply room, receiving area)	motor rooms	1 Band/Orchestra Room	English Learner (EL): 1-2     rooms depending on # EL     identified
Gymnasium and equipment storage		Technology Lab: 1 per school	<ul> <li>2 Unassigned flexible space to accommodate site-based needs</li> <li>Enrollment growth</li> <li>PTO/Volunteer use</li> <li>Intervention spaces</li> <li>D/APE teaching space</li> <li>Calming room/sensory space, motor room</li> <li>Other support space</li> </ul>

Notes:

- Kindergarten and pre-kindergarten rooms are not equivalently sized district-wide
- No dedicated space district-wide for art (except Birch Grove Magnet)
- Kidstop program needs dedicated storage and home-based office space (assuming access to some classrooms for after-school programming
- More than 1 music room is needed at BW, EB, EC, FB, RL, RC, WVR, WD
- Additional PreK depending on space. Currently CI, EB, OAK have 3 PreK classrooms

#### Secondary Assumptions: Assumptions to be used for secondary target capacity analysis

In addition to appropriate content-specific classrooms, all secondary schools need the following spaces: (Spaces listed are needed for all district secondary schools unless otherwise noted)

Custodial (storage, supply room, receiving area)	Administrative Offices Staff Offices	Space for school-specific needs (ex: school store, food pantry)
EL* classroom space	Science labs	Health Services (nurses office)
Storage (student records, curriculum storage, project-based learning materials)	Conference Rooms Copy Room Display cases	High Schools: Auditoriums (dressing rooms, scene shop)
Collaborative Work Space (collaborative planning space and staff workspaces) 3 per senior high	Intervention spaces (calming room, learning labs, alternatives to suspension) 5 per senior high, 4 at MGMS, 3 at BMS & OMS, 2 at NVMS	Restrooms (single-use bathrooms, staff bathrooms, ADA**** accessible bathrooms with changing facilities)
Large group space (assembly space 100-150 people)a	Unassigned classrooms for flexibility (flex classrooms, meeting space, additional room for future growth) add detail 3 per senior high, 2 per middle school	Music (choir, band, orchestra rooms, instrument & music storage) High school: uniform storage
Special education resource & self-contained classroom space, D/APE teaching space, calming room/sensory spaces, motor room	Outdoor PE Facilities: tennis courts (OSH/OMS & PCSH/BMS share), baseball/softball fields, soccer/football fields High school: track (Activities audit information covers this area)	Indoor PE Facilities: gymnasium, equipment room, locker rooms High school: weight room, activities & trainer offices Middle school: pool (note: not part of MS curriculum) (Activities audit information covers this area)
	area) EL* classroom space Storage (student records, curriculum storage, project-based learning materials) Collaborative Work Space (collaborative planning space and staff workspaces) 3 per senior high Large group space (assembly space 100-150 people)a Special education resource & self-contained classroom space, D/APE teaching space, calming room/sensory	area)Staff OfficesEL* classroom spaceScience labsStorage (student records, curriculum storage, project-based learning materials)Conference Rooms Copy Room Display casesCollaborative Work Space (collaborative planning space and staff workspaces) 3 per senior highIntervention spaces (calming room, learning labs, alternatives to suspension) 5 per senior high, 4 at MGMS, 3 at BMS & OMS, 2 at NVMSLarge group space (assembly space 100-150 people)aUnassigned classrooms for flexibility (flex classrooms, meeting space, additional room for future growth) add detail 3 per senior high, 2 per middle schoolSpecial education resource & self-contained classroom space, D/APE teaching space, calming room/sensory spaces, motor roomOutdoor PE Facilities: tennis courts (OSH/OMS & PCSH/BMS share), baseball/softball fields, soccer/football fields High school: track (Activities audit information covers this

KEY: Affects capacity calculation Revised: 10/3/2019 Notes:

- High Schools: CTE specialized space (OSH: Opportunities in Emergency Care (OEC) & Automotive, PCSH: Culinary) + additional space for future expansion of CTE
- Middle Schools: Out of School Time-space (SPOT, targeted services), PLTW space
- Magnet Specific: BMS (art, robotics, engineering design spaces, culinary arts, tv/film studio) PCSH (tv/film studio)
- OALC does not need: community ed/after school programming space, some of the CTE spaces (PLTW), Career Resource Center, auditorium, athletic fields, special education self-contained classroom space
- OALC needs consideration as high school enrollment increases
- Intervention space
- Collaborative workspace for staff at high school
- Unassigned classroom space

# **Elementary Options Questions/Answers** Prepared for ECMAC on December 9, 2019

Question	Answer
How are we accounting for new build growth into survival cohorts?	Grade-level enrollment projections do not include future building growth (see ECMAC presentation at November 18, 2019 meeting). We have included some estimated growth in our school-level enrollment projections, particularly at the elementary level in the Fernbrook attendance area. We have spread out the expected growth across all grade levels and this growth will matriculate through the standard cohort survival methodology. As we receive updated information from the City of Maple Grove, we will update the school-level projections and determine when to integrate the growth into the grade-level enrollment projections.
What is the breakdown of students who are open enrolled vs within the school district's boundaries?	The total K-12 students who open enrolled into the district for the current school year is 1,334, which is down from 1,440 in FY19. This
	represents just over 6% of the total student enrollment.
How many kids live in the boundaries and are not attending Osseo or are we losing kids to just moving?	In the current school year, there are 6,182 students that live within the district boundary and attend another public (charter or other public district) or private (non-public, home-schooled) school.
Is the 2-year notification to families for boundary changes too long?	We know families desire as much advance notice of a boundary change as possible. While the timelines we have analyzed include a 2-year
	notification, the final notification period for any potential boundary change would be determined by the school board.
Is there wiggle room to shift RL kids to EC, EB or PB?	If additions are made at Rice Lake, the intent would be to utilize the new space as much as possible to ease capacity concerns at that school. However, shifts to other elementary schools could be possible as part of a comprehensive boundary change process.
Where do WVR students go after leaving to middle school?	Currently, Weaver Lake students attend their home boundary middle school, unless they intra-district transfer to another school or open enroll into a school outside our district. The most recent data shows that 55% of Weaver Lake 5 <sup>th</sup> graders attended their home boundary middle school for 6 <sup>th</sup> grade, while 12% enrolled into another District 279 middle school and 16% open enrolled to a school outside our district.
What is the price point of the new housing developments in the NW part of Maple Grove?	It is still too early to know what the price points will be.
What is the backup plan if the new elementary school is not approved by the public?	If an option that needs voter approval is not successful, alternate plans may include boundary changes, other funding strategies, or other solutions to ease the impact on over-capacity schools.
Impact Questions	Answers to be determined through an additional planning process that will be initiated if/when an option that includes school boundary changes is adopted by the board.
How will boundary changes impact middle and high school alignment?	If the School Board moves forward with an option that necessitates a boundary change, a working group will be established to:
What are the impacts to bus ride times and bus route efficiencies?	<ol> <li>evaluate how boundary changes would affect enrollment and capacity at the middle and high school levels;</li> <li>evaluate how boundary changes would affect bus routes and</li> </ol>
How will boundary changes affect the demographics at the schools affected?	<ul> <li>student ride times to ensure an efficient transportation system and</li> <li>limit impact for the greatest number of students and families;</li> <li>a) ensure any boundary change does not increase racial isolation in our district.</li> </ul>

# **Secondary Options Questions/Answers** Prepared for ECMAC on December 9, 2019

Question	Answer
Option does not include security issues; what	The district is analyzing security and safety facility needs across the
about repurposing space?	district; the outcome of that analysis could require repurposing of
	existing space that may impact capacity. As decisions are made
	through the Integrated Facilities process, capacities will be updated.
	ECMAC will continue to monitor enrollment/capacity pressures and
	make observations and recommendations, accordingly.
What is the future of the media centers?	The district is analyzing secondary next generation learning spaces
	needs. Part of this effort will be to determine how media centers
	can be used to support personalized learning. The district's facilities
	team will work in coordination with architects and our teaching and
	learning experts to ensure we have media center capacity per MDE
	guidelines and to meet programmatic needs for next generation
	learning.
What about Osseo Area Learning Center (OALC)?	Currently, there are no capacity concerns at OALC but the
	Integrated Facilities Planning process may identify other needs
	(next generation learning spaces, safety/security, etc.)
How will space being considered for cafeteria	The district facilities team, including our architects, will work closely
expansion (i.e. wrestling room at PCSH) be	with each school to understand their needs and to provide
recaptured?	necessary space. This may include moving programs to other spaces
	in the building or may include additions to create that space.
How do you address short-term stress until a	District administration will continue to work with each senior high
long-term solution is implemented?	and will provide the necessary support, including staff, storage, and
	flexible resources to ensure each site can continue to operate at a
	high level until the longer-term solution is implemented.
Is a boundary change an option to address	Based on the current data, a boundary change alone would not
secondary over-capacity concerns?	create enough space in our senior high buildings to address
	classroom/instructional and core space needs.
Is this a long-term solution?	This option addresses over-capacity conditions at our secondary
	sites based on current enrollment projections. The district will
	continue to monitor how future enrollment growth in the NW
	Maple Grove area may affect capacity pressures. Currently, the
	projected growth area is situated in the Osseo Middle School and
	Maple Grove Senior High attendance areas. When this growth
	occurs, future analysis and option development will need to occur
	to ensure balanced enrollment/capacity. Future options may
	include building additions, boundary changes, program relocation, a
	new school or a combination thereof.

(Oak View Addition with Boundary Change)

## **Option Summary:**

- Addition to Oak View Elementary
   Boundary Change to balance enrollment/capacity at Rice Lake Elementary
   Qualifies for short-term or long-term funding options
   Continue to monitor Garden City Elementary and NW Maple Grove growth for new elementary (including future boundary change)
   *Option Timeline:* Implement Fall 2023
  - \$7.7 Million to \$8.7 Million

**Boundary Change Potential Impact** 

(Rice Lake Addition/No Boundary Change)

## **Option Summary:**

- Addition to Rice Lake Elementary
- No Boundary Changes
- Would qualify for short-term or long-term funding options
- Continue to monitor Garden City Elementary and NW Maple Grove growth for new elementary (including boundary changes)

# **Option Timeline:**

Implement Winter 2021

# **Option Estimated Cost:**

\$5.5 Million to \$6.5 Million

Boundary Change Potential Impact

(Weaver Lake Addition with Boundary Change)

## **Option Summary:**

- Addition to Weaver Lake Elementary
- Create a new boundary for Weaver Lake
- STEM program stays as-is
- Boundary changes to balance enrollment/capacity at Rice Lake Elementary
  - Would qualify for short-term or long-term funding options
  - Continue to monitor Garden City Elementary and NW Maple Grove growth for new elementary (with future boundary change)

# **Option Timeline:**

Implement Fall 2023 (2-year notification)

# **Option Estimated Cost:**

# **Boundary Change Potential Impact**

(New Elementary Option)

## **Option Summary:**

- New Elementary School in NW Maple Grove
   Boundary changes to balance capacity across the district, including but not limited to Fernbrook Elementary, Rice Lake Elementary, and Garden City Elementary
  - Long-term funding option only

# **Option Timeline:**

Implement Fall 2023 (with successful passage of Fall 2020 Referendum)

## **Option Estimated Cost:**

\$27.92 Million to \$34.26 Million

# Boundary Change Potential Impact

Approximately 802 students

# **Secondary Capacity Relief Option**

## **Option Summary:**

Addition at Maple Grove Senior High
 Increase cafeteria space at:

- Maple Grove Senior High
- Osseo Senior High
- Park Center Senior High

Increase media center space at:

- Park Center Senior High
- No Boundary Change

## **Option Timeline:**

Substantial Completion by Winter 2023 (with successful passage of Fall of 2020 Referendum)

**Option Estimated Cost:** 

\$16.7 Million to \$18.7 Million

	<b>Option:</b> Oak View Addition; Boundary Changes
What are the drawback/challenges to this option?	
<ul> <li>Unknown boundary change impact</li> </ul>	
<ul> <li>RL parents are "happy" reluctant to move</li> </ul>	
<ul> <li>Boundary changes not only impacting OAK, RL, GC</li> </ul>	
<ul> <li>More boundary changes will come with the new NW elementary</li> </ul>	
<ul> <li>Increased transportation time. Longer bus rides.</li> </ul>	
<ul> <li>Adding on to GC would be a drawback because there are schools in close proximity that are under capacity</li> </ul>	
<ul> <li>Disruption to so many families (drawback of GC – need to take it off)</li> </ul>	
<ul> <li>Boundaries are already not around school already</li> </ul>	
<ul> <li>How does this impact long-term thinking around new school in NW Maple Grove</li> </ul>	
<ul> <li>OAK is not in community it serves (boundaries)</li> </ul>	
<ul> <li>Short-term fix due to several unknowns like the continued growth in the area</li> </ul>	
<ul> <li>Boundary changes are difficult!</li> </ul>	
<ul> <li>Boundary changes would affect 400 kids</li> </ul>	
<ul> <li>OAK has a lingering reputation that is less favorable than some other MG schools</li> </ul>	
<ul> <li>Investing in a lower performing school (OAK) vs in a higher performing one (WVR). Is there a concern that these two</li> </ul>	
schools will bump into each other (OAK and CI)	

How does this option align with ECMAC's guiding principles?	What (if any) alterations would strengthen this option?
<ul> <li>How many students will be affected</li> <li>Student centered</li> <li>It considers all principles</li> <li>It's a decision based on data</li> <li>Might disadvantage special education programs if they are moved again.</li> <li>Based on data – informed</li> <li>Is it in alignment with sustainable</li> <li>What does this do to the demographics of the school</li> <li>Two-year timeline; seems too long of a wait</li> <li>Data informed</li> <li>2-year notification for relief is too long</li> <li>Racial equity work</li> <li>Small impact (400 is small percent of district)</li> <li>Drawback/not aligned</li> <li>Localized – so does not include all students in district</li> <li>Informed by data</li> <li>Contiguous</li> <li>It does provide relief for OAK and GC</li> <li>Data driven</li> <li>May not align because of impact to families</li> <li>Not most fiscally responsible.</li> </ul>	<ul> <li>Show how it fits into a long-term plan</li> <li>Is there wiggle room to shift RL kids to EC, EB or PB?</li> <li>Drop GC as an additional option (monitor GC for over-capacity)</li> <li>Describe bus routes and ride times for students</li> <li>Monitor GC</li> <li>It's a safe, low risk option</li> <li>Are there any positive impacts (e.g., shorter bus rides)?</li> </ul>

What do you like about this option?	How will our community respond to this option?
<ul> <li>Holistic approach is favorable to fix walls.</li> <li>No disruption via boundary change.</li> <li>Cost less money</li> <li>Address the school that needs it; fixing problem directly for future asks – more favorable.</li> <li>Cheap option</li> <li>Solves immediate problem</li> <li>No boundary</li> <li>Cheapest option</li> <li>Like not having disruption now when we may need to down the road with a new school</li> <li>No impact to families.</li> <li>Timeline is self-contained</li> <li>Immediate relief</li> <li>No impact to families</li> <li>No capacity need at GC, so this plan acknowledges that.</li> <li>Help to push along the overall remodel of the school</li> <li>Least expensive of options</li> </ul>	<ul> <li>How will our community respond to this option?</li> <li>More accepting – no surprises less expensive, no one needs to move</li> <li>Shows immediate need and response</li> <li>Community may be concerned with updating RL and then be asked to spend monies for a new building</li> <li>Fiscally responsible</li> <li>Minimal/no disruption (Positive)</li> <li>Some will respond that it only helps RL. What about us?</li> <li>Seems like a short-term solution.</li> <li>People in Brooklyn Center will feel ignored (GC)</li> <li>Will need to communicate and acknowledge why we aren't addressing GC at this time.</li> </ul>
<ul> <li>Doesn't address capacity issues on other side of district.</li> <li>Doesn't solve continuous boundaries issues.</li> <li>Don't like the language around GC, rather say "monitor"</li> <li>Only helps RL</li> </ul>	
<ul> <li>Parking and busing</li> <li>Fixes RL and no others</li> <li>Core space would need to increase</li> </ul>	

^	nn	en	div	0
~	ч٢	CII	uin	U, U

What do you like about this option?	How will our community respond to this option?	
Add more students to STEM	<ul> <li>Families living near school could potentially attend WL</li> </ul>	
<ul> <li>Feels like we are investing in a high performing school and helps</li> </ul>	instead of another school.	
with FB pressure and safety value	<ul> <li>Solution may pull back students who have opted out of the</li> </ul>	
<ul> <li>More access to STEM program</li> </ul>	WL attendance area which may increase capacity.	
<ul> <li>More community (boundary) school created</li> </ul>	Positive	
<ul> <li>Cheaper option for now to delay new school cost</li> </ul>	Some confused	
<ul> <li>Kids impacted by this would go to a better school</li> </ul>	Relief value where needed	
<ul> <li>Addressing capacity at FB and RL</li> </ul>	Cost not positive	
More kids get STEM	<ul> <li>It will break up FB and RL families</li> </ul>	
<ul> <li>Becomes a community school.</li> </ul>	<ul> <li>Current WVR families might not want this</li> </ul>	
Students could be walkers.	<ul> <li>RL families West of 494 and FB families near WVR might be happier because they are closer to their school</li> </ul>	
What are the drawback/challenges to this option?	<ul> <li>Do we really need to build?</li> </ul>	
<ul> <li>We need to train more teachers with STEM curriculum</li> </ul>	<ul> <li>What will the boundary changes look like?</li> </ul>	
<ul> <li>Impacting a school that doesn't have a capacity issue.</li> </ul>	Negatively.	
<ul> <li>Largest boundary changes</li> </ul>		
<ul> <li>Could hurt the STEM program (school culture)</li> </ul>		
<ul> <li>Perception of offering more STEM to only certain communities</li> </ul>		
More expensive		
<ul> <li>All boundary changes will have challenges</li> </ul>		
<ul> <li>Would it dilute the integrity of the STEM program</li> </ul>		
<ul> <li>Can we keep integrity of magnet school adding 400 kids?</li> </ul>		
<ul> <li>Could mean multiple boundary changes over time if we build a new school in the near future.</li> </ul>		
<ul> <li>Site footprint is challenging.</li> </ul>		
<ul> <li>Thought GC was not meeting the 10%.</li> </ul>		
<ul> <li>Boundary change – large impact.</li> </ul>		
<ul> <li>Take away magnet option for some students – would it change</li> </ul>		
demographics?		
<ul> <li>Families may not want STEM option – lack of choice.</li> </ul>		

### **Option:** Weaver Lake Addition; Boundary Changes

	<b>Option:</b> Weaver Lake Addition; Boundary Changes
<ul> <li>Students could come in during 3<sup>rd</sup>/4<sup>th</sup> grade – no progression of programming.</li> </ul>	
<ul> <li>How does this option align with ECMAC's guiding principles?</li> <li>Aligned/advanced notice</li> <li>It will dilute WVR's ideal diversity</li> <li>It will throw off the racial mix of WVR (unfavorably)</li> <li>Magnet schools have diversity targets, what is the demographic of the neighborhood – how does that impact non-diverse students?</li> <li>May negatively impact racial demographics at WVR</li> </ul>	<ul> <li>What (if any) alterations would strengthen this option?</li> <li>Need to unite GC</li> <li>Could be strengthened if this option prevents (delays) the building of a new \$38 million school (only do a boundary change once).</li> <li>Neighborhood and community option like BMS and ZW.</li> <li>Other?</li> <li>Where do WVR students go after leaving to middle school?</li> </ul>

	<b>Option:</b> New Elementary; Boundary Changes
What do you like about this option?	How will our community respond to this option?
Impacts everyone.	Uncertain
Solves long-term needs	• Risky
Addresses long-term concerns	• It will be expensive so the request will have to be clear
Maximizes spending	and compelling.
Gives time to process, plan	<ul> <li>It could be a draw for non-district residents who live</li> </ul>
• Allows us the opportunity to address other issues, e.g. non-	near our boundaries.
contiguous boundaries.	It is needed
<ul> <li>It's a long-term solution</li> </ul>	Tax impact?
Sustainable	• Is building this school inevitable? Why do anything else
<ul> <li>Makes all other plans look like a band-aid</li> </ul>	if we have to do this anyway.
• Keeps mid-size schools and eliminates creating more jumbos	<ul> <li>Stakeholders district-wide could be happy that their</li> </ul>
<ul> <li>Potential to fix all under/over-capacity across the district.</li> </ul>	school needs are being addressed or upset about
Long-term solution	district-wide changes
Looks at entire district	<ul> <li>Something is happening to or for us</li> </ul>
Can fix a lot within the district	<ul> <li>What will the boundary change look like?</li> </ul>
Minimal disruption to families	<ul> <li>Do we need to build or can we leverage our capacity.</li> </ul>
Solves immediate issues	<ul> <li>Not enough of a current need.</li> </ul>
	<ul> <li>Not a strong perception of being overcrowded</li> </ul>
What are the drawback/challenges to this option?	<ul> <li>Large ask – (approx. \$34 million)</li> </ul>
Expensive, slow, timing	<ul> <li>Lack of investment in current schools.</li> </ul>
<ul> <li>Over-capacity may be at higher risk.</li> </ul>	<ul> <li>Operating and tech levy costs – coming due soon.</li> </ul>
<ul> <li>Referendum approval process is a risk.</li> </ul>	<ul> <li>Presidential election year??</li> </ul>
Delays relief at some schools.	<ul> <li>Is high school need greater than elementary?</li> </ul>
Requires plan B if not approved.	<ul> <li>BW and RL families would not respond favorably to</li> </ul>
• Risks: (1) Need a referendum; (2) Capacity estimates correct?	boundary changes
<ul> <li>Tough to pass a levy before homes are built</li> </ul>	They might wonder where their student's cohort would
<ul> <li>Doesn't relieve RL or FB until new school is built</li> </ul>	go to middle school
<ul> <li>Impacts a lot of students/families (800 minimum)</li> </ul>	
Shifts boundaries everywhere	
Voters have to approve	
Takes longest time to complete	
Doesn't help RL and FB now	
<ul> <li>What about the problems today?</li> </ul>	

	<b>Option:</b> New Elementary; Boundary Changes
<ul> <li>What is the price point of the housing?</li> <li>Everyone would have to stick it out – no relief.</li> <li>Pending voter approval to fund</li> <li>Ambiguity around the growth – tough sell.</li> <li>Unknown timeline</li> <li>Three years of learning in hallways.</li> <li>Nobody who lives near OAK lives near OAK</li> <li>Not recommending an addition to GC</li> <li>Nothing wrong with OAK – using this school to solve issues with other schools</li> </ul>	
<ul> <li>How does this option align with ECMAC's guiding principles?</li> <li>Sustainable</li> <li>Gives greatest opportunity to examine implications for all students out of all options.</li> <li>It is informed by data</li> <li>Made with advance notice</li> <li>Would need to explore implications for all students and alignment with racial equity work.</li> <li>Racial equity??</li> <li>Impacts a significant number of students.</li> <li>Looks at the entire district.</li> <li>Data driven but hard sell</li> <li>Boundary changes are comprehensive.</li> </ul>	<ul> <li>What (if any) alterations would strengthen this option?</li> <li>What's the back-up plan if it doesn't get approved?</li> <li>Be clear about the plan to deal with overcapacity concerns at current schools.</li> <li>Clarify value to all community members</li> <li>Need to include updating all buildings in order to gain voter approval.</li> <li>Guarantee funding</li> <li>Communicate clearly</li> <li>What does everybody districtwide "get" or benefit from this plan?</li> <li>Need a short-term relief plan.</li> <li>Boundary changes to GC</li> <li>Move families on east side of RL to under-capacity schools.</li> </ul>

**Secondary Option Observation Form** \*\*Addition to Maple Grove Senior High, add cafeteria space at all three comprehensive high schools, add media space at Park Center Senior High\*\* What do you like about this option? How will our community respond to this option? • Only option; meets needs; no boundary changes; relatively Public perception concerns (west side addition vs. east inexpensive. side remodel) No boundary change (x2) Favorable no boundary change • ٠ Focused to each HS's individual problems Taking away space from OSH and PC, while MGSH gets ٠ Solves all cafeteria issues more. • Need to show community "Big Picture" - positive • Addresses that growth is happening in MG ٠ MG seems to fit w/lay out of building changes everywhere (aligned with other committee • • All schools receiving space to meet need work) Community will be happy we're addressing lunchroom MG addition for core space and instruction • • Provides cafeteria and enrollment problems at all three high concerns. Communicate what happens if we don't do this (people schools ٠ think everything is fine – based on survey results). • No boundary change May reinforce existing narratives. • Touches all three high schools ٠ It's how it is presented. • There is a need that needs to be addressed. ٠ It's expensive – community may not respond well to the Appears cost efficient ٠ • price tag. Comprehensive solution •

- Addresses the need
- Addresses ¾ high schools

### What are the drawback/challenges to this option?

- No other options; is it enough? Public perception.
- Needs voter approval (Fall 2020)
- Can OSH and PC completed during a summer, not disrupt school year
- Bond referendum and timing
- Is a boundary change an option
- When we're taking away space for lunch and media, how will that impact classes and experience
- The perception of MG being newer and building on, vs. OSH and PCSH
- Should be doing more construction?

- It may be difficult to sell this to the public. ٠
- May be concerns that are impacted by other decisions. ٠
- Parents are aware of overcrowding ٠
- Future of media centers how do we tell this story ٠
- Conjunction with all other levies, elections, political climate.

(over)

### Secondary Option Observation Form

**Addition to Maple Grove Senior High, add cafeteria space at all three com	
Are we meeting the projected needs?	
<ul> <li>Is this a long term solution?</li> </ul>	
<ul> <li>Expanding into existing space vs. building onto building.</li> </ul>	
<ul> <li>Is PCSH – Café of 122 as critical as 1000 at MGSH</li> </ul>	
<ul> <li>What is the future of media centers</li> </ul>	
<ul> <li>Do we use the 10% for core spaces?</li> </ul>	
<ul> <li>Does not include security issues, what about repurposing space?</li> </ul>	
• Getting voter approval during a presidential election year. (x2)	
Getting voter buy-in	
What about OALC?	
<ul> <li>How will the space (wrestling) be recaptured</li> </ul>	
<ul> <li>How do you address short-term stress until long-term solution</li> </ul>	
<ul> <li>Equity challenge (3 years) (Perception) West vs. East</li> </ul>	
How does this option align with ECMAC's guiding principles?	What (if any) alterations would strengthen this option?
Student centered.	• Plan for future growth (NW MG) can we add a little
Aligns with data	more to core spaces to be ready
Student at center	<ul> <li>Communication package is important</li> </ul>
Inform and concise	Show images
• Sustainable (x2)	<ul> <li>Make sure change is obvious to community.</li> </ul>
<ul> <li>Racial equity – perception may be a challenge.</li> </ul>	Jump to student
<ul> <li>This option analyzes the information that affects the building</li> </ul>	<ul> <li>Provide additive spaces at all three locations.</li> </ul>
usage at three high schools.	<ul> <li>Figure out a way to stagger costs of secondary and</li> </ul>
Data driven	elementary vs such a large total capacity costs
Working on core capacity spaces	Can we attach program "extras" to this – what kind of
Touches all three schools	21 <sup>st</sup> Century programs/classrooms would be altered.
What percentage do we use for core spaces	Be clear on what is absolutely necessary.
Data driven	<ul> <li>Curious about what learning teams recommend.</li> </ul>
<ul> <li>Identity potential cost and implications for all students</li> </ul>	
	Page Two

Option	Rice Lake Addition
Rational	Immediate relief
(Why this option?)	Putting the kids in the center
	<ul> <li>Allows for more comprehensive options on the table for the future</li> </ul>
	Minimal disruption
Success	<ul> <li>Having alignment (articulate clearly rational)</li> </ul>
(What will make it	Communication plan
successful?)	Everyone gets behind the decision
	<ul> <li>Having staff understand the reason for this option</li> </ul>
	<ul> <li>Communicate clearly to all the schools how we got to this decision</li> </ul>
Implications	<ul> <li>+ Opportunity to look forward – what the future could look like</li> </ul>
(What are the	<ul> <li>+ No boundary changes</li> </ul>
implications of this	<ul> <li>+ Using money we have</li> </ul>
option (+/-?)	<ul> <li>+ Positive impact on transportation</li> </ul>
	<ul> <li>+ Programming for Childcare, EL and Special Education</li> </ul>
	<ul> <li>Some disruption to neighborhood</li> </ul>
	<ul> <li>Green space; relationship with Maple Grove</li> </ul>
	<ul> <li>Why not other schools?</li> </ul>
	<ul> <li>Why hasn't it been done sooner?</li> </ul>
	<ul> <li>Why don't voters have to approve it?</li> </ul>
Considerations	<ul> <li>Use it as a testing ground for what new generation learning looks like</li> </ul>
(What should we suggest	<ul> <li>Engage in thinking about new generation schools</li> </ul>
for considerations to	Gives time to address immediate need and plan for the future, thoughtfully engage
oversight task force?)	the larger community through equity lens

Option	New Elementary
<b>Rational</b> (Why this option?)	<ul> <li>Comprehensive</li> <li>Seems inevitable</li> <li>Solves more long-term</li> <li>Smaller scale options could still be on the table.</li> <li>Same timeline as options one and three</li> </ul>
Success (What will make it successful?) Implications (What are the implications of this	<ul> <li>How we sell it (break it down)</li> <li>Impacts entire district</li> <li>Include other district improvements</li> <li>+ More complete solution</li> <li>+ You'll be spending this money anyways</li> <li>+ High risk/high reward (district tells entire narrative at one time)</li> </ul>
option (+/-?)	<ul> <li>+ Minimizes boundary changes in the long run</li> <li>- Taxpayers say no</li> <li>- Story not ready to be told</li> </ul>
<b>Considerations</b> (What should we suggest for considerations to oversight task force?)	<ul> <li>Is it possible to build in smaller phases (lower cost)?</li> <li>Can we have a good story to sell by 11/2020 (include the right voices)?</li> <li>Data/Research</li> </ul>
