

**Immunization Record Sharing with the Washington State Department of Health:  
Washington State Immunization Information System (WAIS)**

Our school is part of a state immunization record tracking system that includes immunization data from area doctors' offices and health care providers. This information system makes it much easier for us to get copies of your child's immunization record, a requirement for school entry under Washington State law. This information is used solely to help protect your child and prevent disease by improving the quality and timeliness of records and services in our community. The information can only be shared with entities authorized by Washington law (RCW 70.02) to receive it, such as doctors, nurses, public health entities and schools (Family Educational Records Privacy Act).

*Your electronic signature through ParentVue indicates that you authorize the Northshore School District to release your child's immunization record to the Washington State Immunization Information System. I understand this information can only be used to improve the quality and timeliness of immunization records and to assist with determining immunization compliance. This includes any immunization information the school currently has plus any it may obtain during my child's attendance in the Northshore School District. As parent/guardian, your acknowledgment of this authorization is for each of your students within the Northshore School District.*
