

A sample of the kind words from current parents regarding RBC Virtual Instruction as a result of the COVID-19 Pandemic in the spring of 2020.

---

You all have done and continue to do an amazing job under hard circumstances! The transition to online learning on this end was amazing. You have made it normal for Lindsay. She is busy, learning and engaged. You have served as a stable base for a very uncertain time in all of our lives. We owe you a huge debt of gratitude. Everyone is talking about our school community and we cannot wait to see you all again. If there is anything we as parents can help with or do please let us know. - Jackie M ✨

---

Thank you!!!! You all are amazing. So thankful for you and your "guidance" during normal times, and now, this unfortunate time. You have historically, and always will be amazing. It is all of you that "guide" us on how to proceed in good and bad times. Please know that you are appreciated more than words could express!!! Thank you so very much! - Karrie D ✨

I just wanted to send a thank you to you, Mr A., and everyone at RBC for the last two weeks of the online learning. As a parent of 5 children and a teacher we've got 4 different "online schools" going on in our home. So far RBC is the most successful. My girls are up at 8am and on their computers. My Husband and I can hear their classes and are truly impressed with the "normalcy" of their day. The expectations are similar (or as similar as we can get at this time) as when they were physically attending class, their teachers are attentive and understanding but also still making them responsible for their education. So we appreciate all the hard work that is going into everyday, we know first hand how disruptive this is to everyone education, their home life, their social life, their work life and just wanted to say thanks and keep up the good work. -Liz H. ✨

---

Just thought I would also share – I was speaking with my customer in Ohio & a different colleague with family in Boston. They have not started on-line school yet. Mason Ohio has been out of school for 3 weeks (ie. Extended spring break). They were not equipped to do online school so quickly. My colleague said in her family in Boston hadn't started either for same reasons. So I wanted to truly express the appreciation & recognition of agility RBC & all its faculty to transition to this way of teaching. I've gone in to listen/watch a few of my daughter's classes & believe they are doing a terrific job. So a huge thank you too all the RBC Casey team! -Karen M. ✨

---

I wanted to drop a quick note to provide feedback on e-learning now that we are 3 weeks in.

Overall this has worked out way better than expected. The use of Google as the tech provider for the classroom interactions was smart with little to no learning curve.

As I speak to other parents with children in other high schools, I get the impression that we at RBC are doing it right... way better than everyone else (including that school in Lincroft).

Congratulations on implementing a great system on little to no time. It's a massive win for RBC and I feel can be used as a tool to attract more students moving forward (not that you can online school, but rather RBC has the technical tools to stay on the cutting-edge of education better than everyone else).

On a personal note, as a graduate, I am proud that RBC has been able to pivot at such a critical juncture in our society without missing a step. -Matt C. ✨
