November 9, 2020

Dear Parkland High School Staff, Parents & Guardians,

I wanted to make you aware that we were notified today by the Department of Health that four individuals who were last in attendance at Parkland High School on 10/27 (one individual), 10/30 (one individual), and 11/3 (two individuals) have subsequently tested positive for COVID-19. Due to procedures related to privacy laws, I am limited in what I can say. I urge you to also respect the privacy of our students and staff.

The Pennsylvania Department of Health (PA DOH) is monitoring all identified cases. The PA DOH is responsible for all contact tracing and school district administration has assisted our public health officials with this endeavor. Staff members and students that are determined to be a close contact with any individual with a confirmed case of COVID-19 will be directly contacted by PA DOH with instructions to quarantine. Close contacts are those who are within 6 feet distance for greater than or equal to 15 minutes with a person identified as a confirmed case with COVID-19.

PA DOH officials have determined because of the increase in positive cases of individuals at Parkland High School, it is recommended we close our school for the remainder of the week to perform appropriate contact tracing, communicate appropriately any required quarantine recommendations and to continue to clean and disinfect our buildings. All students will continue their education via remote learning during the school closure. Staff will also work remotely during the school closure. We will reopen Parkland High School for hybrid instruction on Monday, November 16, 2020.

Anyone experiencing symptoms should self-quarantine and contact your doctor. If you are feeling ill, it is recommended that you separate from others in the home, wear a face mask, cover coughs and sneezes, clean hands and surfaces often, and avoid sharing personal items. It should be emphasized that anyone who is ill should stay home except to get medical care. As you know, virus symptoms can range from mild to severe and could include fever, cough, shortness of breath, chills without a fever, sore throat, muscle aches and pains, and temporary loss of smell or taste. Symptoms may appear in a few as two days or as long as 14 days after exposure.

If you have questions or concerns regarding your individual health and COVID-19, please contact your primary care physician.

We thank you for your cooperation and support.

Richard T. Sniscak  
Superintendent of Schools
