**Five-Year Developer Fee Findings**

The following findings are made in connection with the public information set forth in Coast Unified School District's Developer Fee Report.

A. With respect to only that portion of the Developer Fees Account remaining unexpended at the end of the 2019-20 fiscal year, the purpose of the Developer Fees is to finance the construction or reconstruction, including modernization of School Facilities necessary to accommodate student population. As necessary, the fees will be used to provide a modernization of the Ag Center at CUHS as well as a shade structure to for our Kindergartener's. There is a cost associated with the modernization of adequate school facilities and a benefit to the students who profit from attending school in adequate, appropriate, safe facilities. The District has current, continuing and growing needs to construct some new facilities and to reconstruct or modernize its older facilities. Insufficient resources are available from the District's operating budget to fund these projects. These projects include, without limitation, the following:

| <b><u>Project</u></b>           | <b><u>Estimated Cost</u></b> |
|---------------------------------|------------------------------|
| 1. Kindergarten Shade Structure | \$35,000                     |
| 2. Ag Center at CUHS            | \$210,516                    |
| 3.                              |                              |
| 4.                              |                              |
| 5.                              |                              |

Note: The District may commission a new site facility condition assessments, site master planning, and a district-wide, comprehensive master facilities plan, which will also include a plan for funding the District's long-term facility needs. These documents will include lists of recommended projects, in order of need and priority.

B. There is a relationship between new residential and commercial/industrial construction and the District's continuing need for the modernization of school facilities, as described in Paragraph A. All new residential construction has an impact on the District. The District's enrollment has varied considerably over the years. In any case, new construction adds to the potential for increased enrollment, and without the new construction, declines would have been even more severe. It is important to remember that developer fees are a one-time collection that can be made only at the time new residential square footage is constructed.

C. With respect to only that portion of the Developer Fees Account remaining unexpended at the end of the 2019-20 fiscal year, the sources and amounts of Anticipated Funding to complete financing of any incomplete improvements identified in Paragraph A are as follows:

| <b><u>Anticipated Source of Funding</u></b> | <b><u>Anticipated Amount of Funding</u></b> |
|---|---|
| 1. State Funding Program Funds              | \$0   |
| 2. General Obligation Bond Proceeds         | \$0   |
| 3. State Eligibility Funding Received       | \$0   |
| 4. Fund 25 - Developer Fees                 | \$215,516.56                                |
| 5. Donations Received                       | 30,000.00                                   |
| Total Anticipated Funding:                  | \$245,516.56                                |

D. With respect to only that portion of the Developer Fees Account remaining unexpended at the end of the 2019-20 fiscal year, the following are the approximate dates on which the Anticipated Funding referred to in Paragraph C above is expected to be deposited into the Account:

| <b><u>Anticipated Source of Funding</u></b> | <b><u>Approximate Dates Funding Expected</u></b> |
|---|--|
| 1. State Funding Program Funds              | N/A  |
| 2. General Obligation Bond Proceeds         | N/A  |
| 3. State Eligibility Funding Received       | N/A  |
| 4. Developer Fees                           | Available Now                                    |
| 5. Donations                                | Available Now                                    |
|   |  |
