

# The Wellington School Maths Challenge

30 November 2013

**Q1.** Which of these calculations does not equal 2013?

**A.**  
 $1 \times 2013$

**B.**  
 $3 \times 671$

**C.**  
 $33 \times 61$

**D.**  
 $11 \times 183$

**E.**  
 $31 \times 63$

**Q2.** In a game of snooker, potting each red ball is worth 1 point and the other coloured balls are worth:

Yellow = 2 points

Blue = 5 points

Green = 3 points

Pink = 6 points

Brown = 4 points

Black = 7 points

How many points do I score if I pot 7 red balls, 3 black balls, 2 pink balls, one green ball and a brown ball?

**A.**  
47

**B.**  
48

**C.**  
49

**D.**  
50

**E.**  
51

**Q3.** Start with £3000.  
Find 20% of this amount.  
Now find 10% of the new amount.  
Finally, find 5% of this new amount.  
What is the answer?

**A.**  
30p

**B.**  
60p

**C.**  
£3

**D.**  
£6

**E.**  
£30

**Q4.** Andy builds a 4 metre long fence using 13 wooden posts.  
How many posts are needed to build a 12 metre long fence?

**A.**  
36

**B.**  
37

**C.**  
38

**D.**  
39

**E.**  
40

**Q5.** Geoff adds together the number of vertices, edges and faces of a cube. The answer is 26.  
Sam adds together the number of vertices, edges and faces of a square based pyramid. What is her answer?

- A.** 14                      **B.** 15                      **C.** 16                      **D.** 17                      **E.** 18

**Q6.**  $\sqrt{42436} =$

- A.** 204                      **B.** 206                      **C.** 214                      **D.** 216                      **E.** 21218

**Q7.** A film is 2 hours and 47 minutes long.  
If it finishes at 2103 hours, when did it start?

- A.** 6.16pm                      **B.** 6.56pm                      **C.** 7.06pm                      **D.** 7.16pm                      **E.** 7.56pm

**Q8.** A ball bounces around this rectangle. Which corner does it meet first?

- A.** Top Left                      **B.** Top Right                      **C.** Bottom Left                      **D.** Bottom Right                      **E.** None

**Q9.** Victoria buys 8 pencils costing 39p each and 9 pens costing 76p each. How much change does she get from £10?

- A.** none                      **B.** 4p                      **C.** 12p                      **D.** 13p                      **E.** 41p

**Q10.** One of the answers to these questions is different. Which one is the odd one out?

- A.**  $432 \div 24$                       **B.**  $486 \div 27$                       **C.**  $576 \div 32$                       **D.**  $608 \div 38$                       **E.**  $810 \div 45$

**Q11.** His Royal Highness Prince George of Cambridge was born on 22 July. How many days old is he today?

- A.** 130                      **B.** 131                      **C.** 132                      **D.** 133                      **E.** 134

**Q12.** Tom wants to draw a straight line joining two of the dots shown:

How many different lines could he draw?

- A.** 5                      **B.** 8                      **C.** 9                      **D.** 10                      **E.** 11

**Q13.** Fred is  $y$  years old. Gary is three years older than Fred. Harry is twice Fred's age. What is the sum of their ages?

- A.**  $2y + 3$       **B.**  $3y + 6$       **C.**  $3y + 3$       **D.**  $3y - 3$       **E.**  $4y + 3$

**Q14.** 12 has 6 different factors: 1, 2, 3, 4, 6, 12. How many different factors does 36 have?

- A.** 6      **B.** 8      **C.** 9      **D.** 10      **E.** 12

**Q15.**  $25 - 10 \times 2^2 =$

- A.** -375      **B.** -15      **C.** 25      **D.** 60      **E.** 900

**Q16.** When these shapes are placed in order of their areas, which is in the middle? The shapes shown are not the correct size.

**A.**

**B.**

**C.**

**D.**

**E.**

**Q17.** How many of these statements are true?

- 100 is a square number
- 39 is a prime number
- $2^3 = 8$
- 36 is a multiple of 8

**A.**  
none

**B.**  
one

**C.**  
two

**D.**  
three

**E.**  
all four

**Q18.** Two of the angles in a triangle are  $35.5^\circ$  and  $44.4^\circ$ .  
What is the size of the third angle?

**A.**  
 $99.1^\circ$

**B.**  
 $99.9^\circ$

**C.**  
 $100.1^\circ$

**D.**  
 $100.9^\circ$

**E.**  
 $180.1^\circ$

**Q19.** I start with £80. I add  $\frac{3}{4}$  of this amount and then subtract  $\frac{3}{4}$  of the new value. How much do I have now?

**A.**  
£35

**B.**  
£60

**C.**  
£80

**D.**  
£105

**E.**  
£140

**Q20.** In this question  $A = 1$ ,  $B = 2$  and so on. This means that June = 50.  
Which of these combinations is equal to April + August?

**A.**  
June  
+  
November

**B.**  
March  
+  
September

**C.**  
July  
+  
October

**D.**  
January  
+  
December

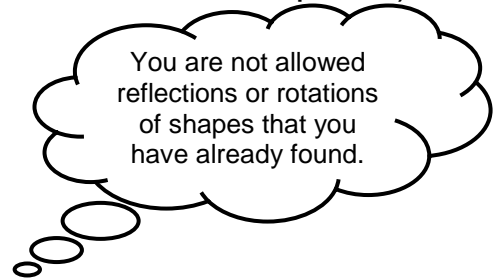

**E.**  
February  
+  
May

The following five questions are not multiple choice.  
Write your answers on the answer sheet in the spaces provided.

**Q21.** If I had four times as much money as I have now, my money would be as much over £1000 as the amount I have now is less than £1000.  
How much money do I have?

**Q22.** Andrew adds together four consecutive numbers: 6, 7, 8 and 9.  
He gets the answer 30.  
Norman multiplies four consecutive numbers.  
He gets the answer 43680. What numbers did Norman use?

**Q23.** There are five different tetrominoes (shapes made from four squares).  
Here they are:

How many different pentominoes (five squares) are there?

**Q24.** Harry went to Ollivanders and bought a wand for 7 Galleons.  
1 Galleon is worth 17 Sickles and 1 Sickle is worth 29 Knuts.  
How many Knuts did Harry's wand cost?

**Q25.** Mr Reader has exactly 5 coins in his pocket.  
He has more than 5p in total.  
He could have 6p:

He could have 7p:

What is the least amount that he cannot have?  
You can use any current British coins.
