

5 TIPS FOR TAKING CARE OF YOUR MACBOOK

Keep Food and Drinks Away

Keep liquids and food away from the product, unless otherwise noted for specific cleaning products.

Carrying Your Device

To transport device either put your device to sleep mode or shut down based on how long until used again. Unplug all external power sources, devices, and cables. Place your MacBook and cords into its protection case when going between classes or to and from school.

Clean Your Device With Soft Cloth

Use only a soft, lint-free cloth. Avoid abrasive cloths, towels, paper towels, or similar items. Avoid excessive wiping, which might cause damage.

Monitoring Battery Life

Try to plug in your device for charging before it reaches 20% or less. To extend battery life on a given charge, you can reduce the display brightness, close apps, and disconnect peripheral devices you're not using.

Use of Cleaning Products

Avoid getting moisture into any openings. Aerosol sprays, bleaches, or abrasives should not be used in cleaning. Spray cleaners onto soft, lint-free cloth and not directly onto the MacBook. Using a 70 percent isopropyl alcohol wipe or Clorox Disinfecting Wipes, you may gently wipe the hard, nonporous surfaces of your Apple product, such as the display, keyboard, or other exterior surfaces.

If there is ever concern with the condition of your MacBook please bring it to a ROCORI Staff Member. Try not to repair or fix it on your own.
