

FREQUENTLY ASKED QUESTIONS

Q: How is the CCP course factored into the student's high school GPA? A: CCP courses will be computed into their HS GPA using the same 5.0 scale as Advanced Placement courses. It will be recorded on the student's high school transcript and factored into their college GPA as well.

Q: What happens if I fail a CCP Course? A: For students who do not pass a CCP course or withdraw from the course after the college's required date, the grade will appear on both the college and high school transcripts (i.e., F or W). The course grade of "F" will be computed into the high school and college grade point average.

Q: Can I be placed on CCP probation or dismissed from the program? A: Yes. If a student earns lower than a 2.0 GPA in college or withdraws from two or more courses in the same term (see also, Underperforming Student Rule 3333-1-65.13).

Q: If I receive a D- or above, can I retake the course to improve my grade? A: If the college allows the student to retake a course, they must do so outside the college credit program at their own expense. The college course grade will appear on the student's transcript.

Q: If I fail the course (E or F) can I retake it? A: It depends on the college policies. If they allow you to retake the course, then the new college grade may be applied to the high school transcript. The course retake is at the expense of the student.

Note: A student must see their college professor or college advisor about all CCP grades.

COLLEGE CREDIT PLUS

Olentangy Local Schools participates in the College Credit Plus Program (CCP) where college-ready students in grades 7-12 can earn high school and college credit at the same time.

If you choose to pursue this opportunity, please complete your Intent to Participate Form and return it to your counselor by March 26, 2021. Counselors will assist students to help determine if CCP is the right choice for them. Approval of your Intent to Participate Form by your counselor allows students to start the admissions process at the participating area college / university of your choice.

Detailed information regarding eligibility, admission, assessment requirements, and the registration process is available at <https://www.ohiohighered.org/ccp>.

RISKS OF CCP

- College courses may be challenging and require additional time commitments. Once enrolled, ALL correspondence about grades and course materials must be handled through the college / university professor or advisor.
- You must follow the college's academic calendar.
- Transportation is not provided.
- Due to course rigor, students may find that they have less time to be involved in extra-curricular activities and/or after school jobs.
- Students who enroll will be asked to repay the local school district for the cost of tuition and books if they fail the course (earning a grade of E or F) or withdraw from a course after the "drop date" unless the student is considered economically disadvantaged.
- All CCP courses will appear on the high school transcript and will be calculated into the students overall GPA.
- It may have an impact on athletic eligibility.
- Federal financial aid may be impacted: federal guidelines limit the number of courses you may attempt (even if they are taken while in high school) to 150% of the number of credits needed for a degree.

ADVANTAGES OF CCP

- Students can earn free college credit (including tuition and books).
- Students have the opportunity to enroll in classes not available at their high school.
- Students have the opportunity to experience a college classroom environment.

COST OF CCP

Students are limited to the equivalent of 30 total credits per academic year paid for by Olentangy. Students wishing to earn more than 30 credits per academic year will be responsible for all cost of attendance for each credit above the 30 credit limit. High school academic classes are equivalent to 3 college credits for purposes of this calculation, so a student with an academic course in each of 8 high school class periods already uses 24 credits ($8 \times 3 = 24$). In this scenario, the student would be eligible for 6 CCP credits ($30 - 24 = 6$) at no cost to the student.
